Measurement of radioactivity in the environment - Soil - Part 7: In situ measurement of gamma-emitting radionuclides

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms, definitions, symbols, and units	2
3.1	Terms and definitions	2
3.2	Symbols and units	3
4	Principles	6
4.1	Measurement method	6
4.2	Uncertainties of the measurement method	6
5	Equipment	6
5.1	Portable in situ spectrometry system	6
5.2	Detector System	7
5.3	Pulse processing electronics	8
5.4	Assembly jig for a detector system	9
5.5	Collimated detector	9
6	Procedure	12
6.1	Calibration	12
6.2	Method of combined calibrations	12
7	Quality assurance and quality control program	17
7.1	General	17
7.2	Influencing variables	17
7.3	Instrument verification	17
7.4	Method verification	17
7.5	Quality control program	17
7.6	Standard operating procedure	19
8	Expression of results	19
8.1	Calculation of activity per unit of surface area or unit of mass	19
8.2	Calculation of the characteristic limits and the best estimate of the measurand as well as its standard uncertainty	19
8.3	Calculation of the radionuclide specific ambient dose rate	21
9	Test report	22
Annex A (informative)	Influence of radionuclides in air on the result of surface or mass activity measured by in situ gamma spectrometry	23
Annex B (informative)	Influence quantities	24
Annex C (informative)	Characteristics of germanium detectors	27

Annex D (informative) Field-of-view of an in situ gamma spectrometer as a function of the photon energy for different radionuclides distributions in soil	29
Annex E (informative) Methods for calculating geometry factors and angular correction factors	33
Annex F (informative) Example for calculation of the characteristic limits as well as the best estimate of the measurand and its standard uncertainty	41
Annex G (informative) Conversion factors for surface or mass activity to air kerma rate and ambient dose equivalent rate for different radionuclides distribution in soil	45
Annex H (informative) Mass attenuation factors for soil and attenuation factors for air as a function of photon energy and deviation of G(E,V) for different soil compositions	52
Bibliography	54
