DIN EN ISO 18276:2017-07 (E)

Welding consumables - Tubular cored electrodes for gas-shielded and non-gas-shielded metal arc welding of high strength s teels - Classification (ISO 18276:2017)

Contents

Page

European foreword ... **3**

Foreword ... **4**

Introduction ... **5**

1 Scope ... **6**

2 Normative references ... **6**

3 Terms and definitions ... **7**

4 Classification ... **7**

5 Symbols and requirements ... **8**
5.1 Symbol for the product/process ... 8
5.2 Symbol for tensile properties of all-weld metal ... 9
5.3 Symbol for impact properties of all-weld metal ... 9
5.4 Symbol for chemical composition of all-weld metal ... 10
5.5 Symbol for type of electrode core or the usability characteristics of the electrodes ... 13
5.6 Symbol for shielding gas ... 14
5.7 Symbol for welding position ... 14
5.8 Symbol for hydrogen content of deposited metal ... 14
5.9 Symbol for conditions of post-weld heat treatment ... 15

6 Rounding procedure ... **15**

7 Mechanical tests ... **15**
7.1 Preheating and interpass temperatures ... 15
7.2 Pass sequence ... 16
7.3 Post-weld heat treatment (PWHT) condition ... 17

8 Chemical analysis ... **17**

9 Retesting ... **17**

10 Technical delivery conditions ... **17**

11 Examples of designations ... **17**

Annex A (informative) **Classification systems** ... **20**

Annex B (informative) **Description of composition designations for electrodes in the classification system based upon tensile strength and average impact energy of 27 J** ... **23**

Annex C (informative) **Description of types of electrode core in the classification system based upon yield strength and average impact energy of 47 J** ... **24**

Annex D (informative) **Descriptions of types of usability characteristics in the classification system based upon tensile strength and average impact energy of 27 J** ... **25**

Annex E (informative) **Notes on hydrogen content** ... **27**

Bibliography ... **28**
