DIN EN 997:2008-03 (E)

WC pans and WC suites with integral trap (includes Amendment A1:2006)

Contents

Page

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Classification 8

5 Functional requirements and test methods for class 1 products 8
5.1 Depth of water seal 8
5.2 Flushing requirements 8
5.2.1 General 8
5.2.2 Wash of bowl 9
5.2.3 Flushing of toilet paper 9
5.2.4 Flushing of fifty small plastic balls 9
5.2.5 Over-splashing 9
5.2.6 After-flush volume 9
5.3 Water absorption 9
5.4 Static load 9
5.5 Leak tightness 9
5.6 Valve reliability 10
5.7 Durability of class 1 products 10
5.8 Test methods 10
5.8.1 Depth of water seal 10
5.8.2 Flushing tests 10
5.8.3 Determination of water absorption 12
5.8.4 Load test 13
5.8.5 Leak tightness 13
5.8.6 Valve reliability 13
5.9 Types of WC pans 14
5.9.1 Nominal flush volume 14
5.9.2 Flushing devices 15

6 Functional requirements and test methods for class 2 products 15
6.1 Inlet valve 15
6.2 Backflow prevention 15
6.3 Marking of flushing cistern 15
6.4 Warning pipe and overflow provision 15
6.5 Flush Volume 15
6.5.1 Full flush 15
6.5.2 Reduced flush 15
6.6 Flush rate 16
6.7 Physical endurance and leakage of flushing device (valve reliability and water/leak tightness) 16
6.8 Chemical endurance of flushing device (water/leak tightness) 16
6.9 Solids discharge and after-flush volume for maximum flush 16
6.10 Paper discharge for reduced-flush volume 16
6.11 Liquid contaminant dye retention 16
6.12 Wash of bowl 16
6.13 Depth of water seal 16
6.14 Static load of class 2 products 16
6.15 Water absorption 17

33 : : : - 6.16 Durability of class 2 products 17

6.17 Test methods 17
6.17.1 Inlet valve tests 17
6.17.2 Warning pipe and overflow provisions 17
6.17.3 Flush volume and water trap seal tests 17
6.17.4 Flush rate test 18
6.17.5 Physical endurance and leakage test of flushing device 19
6.17.6 Chemical endurance test of flushing device 20
6.17.7 Solids discharge and after-flush volume for maximum flush volume test 21
6.17.8 Paper discharge for reduced-flush volume test 22
6.17.9 Liquid contaminant dye retention test 22
6.17.10 Wash of bowl 23
6.17.11 Summary of requirements for compatibility testing of class 2 products 24

7 Dangerous substances 24

8 Marking 24

9 Evaluation of conformity 26
9.1 General 26
9.2 Type testing 27
9.2.1 Initial type testing 27
9.2.2 Further type testing 27
9.2.3 Sample, testing and compliance criteria 27
9.3 Factory Production Control (FPC) 28
9.3.1 General 28
9.3.2 Testing equipment 28
9.3.3 Raw materials and components 28
9.3.4 Product testing and assessment 29
9.3.5 Non-conforming products 29

Annex A (normative) Valve-type test flushing cistern 30

Annex B (normative) Test rig for pressure flush valve 32

Annex C (normative) Test rig for after-flush volume test 35

C.1 Test rig for after-flush volume test for independent WC pans (Figures C.1 and C.2) 35
C.2 Test rig for after-flush volume test for one-piece WC pans, close-coupled suites and WC suites (Figure C.3) 36

Annex D (normative) Basket method 37

Annex E (normative) Preparation of test specimens 38

Annex F (normative) Valveless-type test flushing cistern 40

Annex ZA (informative) Clauses of this European Standard addressing the provisions of the EU Construction Products Directive 42

ZA.1 Scope and relevant characteristics 42

ZA.2 Procedure for attestation of conformity of WC pans, WC suites and one-piece WC pans 44

ZA.2.1 System of attestation of conformity 44

ZA.2.2 Declaration of conformity 44

ZA.3 CE marking 45
