ISO 16641:2014-10 (E)

Measurement of radioactivity in the environment - Air - Radon 220: Integrated measurem ent methods for the determination of the average activity concentration using passive solid-state nuclear track detectors

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms,definitions,andsymbols 1
3.1 Terms and definitions 1
3.2 Symbols 3

4 Principle of the measurement method 4

5 Equipment 5

6 Sampling 6
6.1 Sampling objective 6
6.2 Sampling characteristics 6
6.3 Sampling conditions 6

7 Detection method with solid-state nuclear track detectors (SSNTD) 7

8 Measurement procedure 7
8.1 General 7
8.2 Influencing variables 8
8.3 Calibration 8

9 Expression of results 9
9.1 Average thoron activity concentration 9
9.2 Standard uncertainty 9
9.3 Decision threshold 10
9.4 Detection limit 10
9.5 Confidence limits 11
9.6 Example 11

10 Test report 12

Annex A (informative) Radon-220 and its decay products 14

Bibliography 16
