DIN EN ISO 11439:2013-09 (E)

Gas cylinders - High pressure cylinders for the on-board storage of natural gas as a fuel for automotive vehicles (ISO 11439:2013)

Contents

Page

Foreword .....

Introduction .....

1 Scope .....

2 Normative references .....

3 Termsanddefinitions .....

4 Service conditions .....
4.1 General .....
4.2 Maximum pressures .....
4.3 Design number of filling cycles .....
4.4 Temperature range .....
4.5 Gas composition .....
4.6 External surfaces .....

5 Inspection and testing .....

6 Type approval procedure .....
6.1 General .....
6.2 Type approval .....
6.3 Statement of service .....
6.4 Design data .....
6.5 Manufacturing data .....
6.6 Fracture performance and non-destructive examination (NDE) defect size .....
6.7 Specification sheet .....
6.8 Additional supporting data .....
6.9 Type approval certificate .....

7 Requirements for type 1 metal cylinders .....
7.1 General .....
7.2 Materials .....
7.3 Design Requirements .....
7.4 Construction and workmanship .....
7.5 Prototype testing procedure 16
7.6 Batch tests 18
7.7 Tests on every cylinder .....
7.8 Batch acceptance certificate .....
7.9 Failure to meet test requirements .....

8 Requirements for type 2 hoop-wrapped cylinders .....
8.1 General .....
8.2 Materials .....
8.3 Design requirements .....
8.4 Construction and workmanship .....
8.5 Prototype testing procedure .....
8.6 Batch tests on liners and cylinders 27
8.7 Tests on every liner and cylinder .....
8.8 Batch acceptance certificate .....

8.9 Failure to meet test requirements .....

9 Requirements for type 3 fully-wrapped cylinders .....
9.1 General .....
9.2 Materials .....
9.3 Design requirements .....
9.4 Construction and workmanship .....
9.5 Prototype testing procedure 36
9.6 Batch tests on liners and cylinders .....
9.7 Tests on every liner and cylinder .....

10 10 11 11 11 11 13 13 13 13 13 13 13 14 14 15 20 20 20 21 21 21 22 525 30 31 31 32 32 32 33
41 40 9.8 Batch acceptance certificate .....

9.9 Failure to meet test requirements .....

10 Requirements for type 4 fully-wrapped composite cylinders .....
10.1 General .....
10.2 Materials .....
10.3 Design requirements .....
10.4 Construction and workmanship .....
10.5 Prototype testing procedure 45
10.6 Batch tests .....
10.7 Tests on every cylinder .....
10.8 Batch acceptance certificate .....
10.9 Failure to meet test requirements .....

11 Marking 54

12 Preparation for dispatch 55

Annex A (normative) Test methods and criteria 56

Annex B (normative) Ultrasonic examination 65

Annex C (informative)Non-destructiveexamination(NDE)defectsizebyflawed cylinder cycling 69

Annex D (informative) Report forms .....

Annex E (informative) Standard working pressures .....

Annex F (informative)Verificationofstressratiosusingstraingauges .....

Annex G (informative) Manufacturer's instructions for handling, use and inspection of cylinders 75
