ISO/IEC 19989-2:2020 (E)

Information security — Criteria and methodology for security evaluation of biometric systems — Part 2: Biometric recognition performance

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms

5 Supplementary activities to ISO/IEC 18045 on ATE tests

- 5.1 General
- 5.1.1 Guidance
- 5.1.2 Remarks for performance evaluation
- 5.1.3 Identification of the type of performance evaluation
- 5.1.4 Biometric recognition error rates
- 5.1.4.1 Metrics for biometric verification
- 5.1.4.2 Metrics for biometric identification
- 5.1.4.3 Identification of relevant error rates
- 5.1.4.4 Determining maximum values for error rates
- 5.2 Planning the evaluation
- 5.2.1 Overview
- 5.2.2 Estimation of test sizes
- 5.2.3 Test documentation
- 5.3 Data collection
- 5.3.1 Choice of test data or acquiring test crew and capture device
- 5.3.2 Performing test
- 5.4 Analyses
- 5.5 Reviewing developer tests
- 5.6 Specific requirements on assurance components on ATE_IND
- 5.6.1 Overview
- 5.6.2 Specific requirements on ATE_IND.1
- 5.6.3 Specific requirements on ATE_IND.2
- 5.7 Assessing developer tests by repeating a test subset
- 5.8 Conducting independent testing
- 5.8.1 Overview
- 5.8.2 Identification of the type of performance evaluation

6 Supplementary activities to ISO/IEC 18045 on vulnerability assessment (AVA)

- 6.1 General aspects
- 6.2 TOE for testing
- 6.3 Potential vulnerabilities
- 6.4 Rating attack potential

Annex A (informative) Examples of attack potential computation for AVA activities

- A.1 General
- A.2 Hill climbing
- A.3 Combined attack (getting comparison scores in an indirect way)
- A.4 Inverse biometrics attack
- A.5 Dictionary attack
- A.6 Wolf attack

Annex B (informative) Examples for ATE activities

B.1 General
B.2 Example on identifying relevant errors
B.3 Example on determining maximum permissible values for relevant error rates

Annex C (informative) Example of developer's performance test document and its assessment strategy

C.1 General
C.2 Providing the test document
C.3 Summary
C.4 Reporting items description
C.4.1 General
C.4.2 Overview of the performance testing
C.4.2.1 General principle
C.4.2.2 Performance test configuration
C.4.2.3 Result of the performance testing
C.4.3 Target application and influential factors
C.4.4 Test subject selection
C.4.5 Test instructions and training
C.4.6 Test subject management
C.4.7 Test procedure
