ISO/IEC 29121:2021 (E)

Information technology — Digitally recorded media for information interchange and storage — Data migration method for optical disks for long-term data storage

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 General

5 Test method for measuring maximum data error

- 5.1 Maximum data error for each disk
- 5.2 Ambient condition of maximum data error measurement
- 5.3 Test area and sample disk
- 5.4 Test drive
- 5.4.1 General
- 5.4.2 Test drive check
- 5.5 Disk preparation
- 5.6 Test execution

6 Test interval for periodic performance test

7 Test result evaluation

- 7.1 Initial performance test
- 7.2 Periodic performance test

8 Prevention of deterioration

Annex A (informative) Causes of deterioration for optical disks for long-term data storage

- A.1 Deterioration
- A.2 Disk structure
- A.3 Causes of deterioration
- A.4 Nature of deterioration
- A.5 Effects of deterioration
- A.6 Unexpected deterioration

Annex B (informative) Recommendations on handling, storage and cleaning conditions for optical disks for long-term data storage

- B.1 Handling
- B.2 Storage
- B.3 Cleaning

Annex C (informative) Relation between BER and PIsum 8

Annex D (informative) Guideline for adjustment of the estimated lifetime to higher stress conditions

Annex E (normative) Calculation for Bmig life using B50 life and B5 life

Annex F (normative) Guidelines for test interval and migration

F.1 General
F.2 Test interval and data migration
F.3 Specific calculation examples

Annex G (informative) Test area and sample disk for periodic performance test

Annex H (informative) RSERmax criteria for BD recordable and BD rewritable disks

Annex I (informative) Guideline for treatment of defects
