European foreword 4

Introduction 5

1 Scope 6
1.1 Introduction 6
1.2 In scope 6
1.3 Out of scope 6

2 Normative references 7

3 Terms, definitions and abbreviations 7

4 Applicability 7

5 Fundamentals and concepts for long-term archiving of 3D mechanical CAD information 7
5.1 Introduction 7
5.2 CAD essential information: dependencies on the CAD methods used 9
5.3 Dependency of CAD essential information on use case 10
5.4 Use cases shared by different aerospace communities 11
5.5 Long-term archiving and retrieval of CAD as part of the company risk management 12
5.6 CAD reference model for long-term archiving of design intent 13
5.7 Long-term archiving of CAD and the maturity of related technologies 15
5.8 Archiving of several files for the same CAD model 16

6 Document structure of EN 9300-1XX family 16
6.1 Introduction 16
6.2 Link with other EN 9300 parts 17
6.2.1 Link between parts EN 9300-1XX for fundamental and concepts 17
6.2.2 Relationship/linking between the EN 9300-1XX family 17

7 Qualification methods for long term preservation of archived CAD information 18
7.1 Introduction 18
7.2 Specific qualification processes for long term archiving of CAD models and associated tolerance thresholds 19
7.3 Categorization of CAD archived files according to a risk management analysis 20
7.4 Repair in case of identification of errors after retrieval 21

8 Preservation planning of archived CAD information 21
8.1 Introduction 21
8.2 Evolution of CAD systems and other related applications (3D viewers) 22
8.3 Creation of new validation properties and verification rules 23
8.4 Evolution of standards and the related relevant recommended practices 23
8.5 Evolution of business requirements 23
8.6 Review of the preservation planning policy 23

9 Administration and monitoring 24

10 Definition of archive information packages for CAD data 25
10.1 General 25
10.2 Content information 25
10.3 Preservation Description Information (PDI) 26
10.3.1 Introduction 26
10.3.2 Reference information 26
10.3.3 Context information 27
10.3.4 Provenance information 27
10.3.5 Fixity information 28
10.3.6 Application of PDI data for LTA of 3D CAD 28
10.4 Packaging information 29
10.5 Descriptive information 29

Annex A (informative) **The progression of content within CAD systems 31**

Annex B (informative) **Template for the table of contents of a part of the family EN 9300-1xx 32**

Annex C (information) **Considerations for long-term preservation of CAD 3D information 33**

Annex D (informative) **Definition of a representative sample of test cases 42**

Annex E (informative) **Example of performance indicators used to manage longevity of CAD archived information 45**

Annex F (informative) **Maturity of the main components for long-term archiving of CAD mechanical information 48**

Bibliography 49
