

ISO/IEC 30100-2:2016-04 (E)

Information technology - Home network resource management - Part 2: Architecture

CONTENTS

- FOREWORD..... 4
- INTRODUCTION..... 5
- 1 Scope..... 6
- 2 Normative references..... 6
- 3 Terms, definitions and abbreviations 7
 - 3.1 Terms and definitions 7
 - 3.2 Abbreviations 9
 - 3.3 Conventions 10
- 4 Conformance 10
- 5 Home network resource management 10
 - 5.1 Information resource categories..... 10
 - 5.2 Architecture 11
 - 5.3 Resource information provider 13
 - 5.4 Home resource management process 14
 - 5.5 Management application..... 14
 - 5.6 Interface 15
- 6 Home resource model..... 16
 - 6.1 Home resource model 16
 - 6.2 Home resource object 16
 - 6.2.1 Domain, class and resource object 16
 - 6.2.2 Resource object structure 19
 - 6.3 Domain-specific information 19
 - 6.3.1 General..... 19
 - 6.3.2 Device specific information 20
 - 6.3.3 Network specific information 20
 - 6.3.4 Physical space specific information..... 20
 - 6.3.5 Service specific information 20
 - 6.4 Home resource relation object 21
 - 6.4.1 Definition 21
 - 6.4.2 BNF notation of resource relation object 22
 - 6.5 Miscellaneous 23
 - 6.5.1 Relationship generation methods 23
 - 6.5.2 Common policy 23
 - 6.5.3 Privacy..... 23
- 7 Home network resource information modeling 24
 - 7.1 Overview..... 24
 - 7.2 Device-specific information modelling 24
 - 7.3 Network specific information 101
 - 7.4 Physical space-specific information modelling 116
 - 7.5 Service-Specific Information modelling 133

Annex A (informative) Implementation of IWML (example)	189
A.1 Overview.....	189
A.2 IWML.....	189
A.2.1 General.....	189
A.2.2 IWML: Device description schema	189
Annex B (informative) Security and privacy model (examples).....	192
B.1 Overview.....	192
B.2 Security and Privacy model	192
B.2.1 General.....	192
B.2.2 Access control: XACML	192
B.2.3 Encryption: XML encryption	193
B.2.4 Signature: XML signature	193
Annex C (informative) Implementation of home resource model (example)	194
C.1 Overview.....	194
C.2 Resource types of resource object.....	194
C.2.1 General.....	194
C.2.2 Resource type of device domain	194
C.2.3 Resource type of network domain	195
C.2.4 Resource type of service domain	195
C.2.5 Resource type of physical space domain	196
Bibliography	197
Figure 1 – Logical concept of home resource management architecture	11
Figure 2 – Overview of the home network resource management architecture	12
Figure 3 – Resource information provider collects data from one or more HES entities	13
Figure 4 – Resource management process model.....	14
Figure 5 – Management information	15
Figure 6 – Interfaces of resource management process	15
Figure 7 – Resource object hierarchy	18
Figure 8 – Resource object structure	19
Figure 9 – Home resource relation object	21
Table 1 – Notations in ISO/IEC and this standard	10
Table 2 – Definition of resource domain ID	19
Table 3 – Resource relation types	22
Table 4 – BNF notation of resource relation object.....	23
