

# IEC/TR 62366-2:2016-04 (E)

## Medical devices - Part 2: Guidance on the application of usability engineering to medical devices

---

| Contents  | Page |
|---|------|
| FOREWORD.....   | 6    |
| INTRODUCTION.....   | 8    |
| 1 Scope and purpose.....  | 9    |
| 1.1 Scope.....  | 9    |
| 1.2 Purpose.....  | 9    |
| 2 Normative references.....   | 10   |
| 3 Terms and definitions.....  | 11   |
| 4 Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2..... | 14   |
| 5 Background and justification of the USABILITY ENGINEERING program.....                  | 14   |
| 5.1 How SAFETY relates to USABILITY.....  | 14   |
| 5.2 Reasons to invest in USABILITY ENGINEERING.....                                       | 15   |
| 6 How to implement a USABILITY ENGINEERING program.....                                   | 16   |
| 6.1 Effective USABILITY ENGINEERING programs.....   | 16   |
| 6.2 Effective USABILITY ENGINEERING projects and plans.....                               | 16   |
| 6.3 Apply an appropriate level of USABILITY ENGINEERING expertise.....                    | 17   |
| 6.4 Ensure the necessary resources are available and well timed.....                      | 18   |
| 6.5 RISK MANAGEMENT as it relates to USABILITY ENGINEERING.....                           | 18   |
| 6.5.1 RISK ANALYSIS.....  | 18   |
| 6.5.2 RISK CONTROL.....   | 19   |
| 6.5.3 Information for SAFETY.....   | 20   |
| 6.5.4 Overall evaluation of RESIDUAL RISK.....  | 22   |
| 6.6 USABILITY ENGINEERING FILE.....   | 22   |
| 6.7 Tailoring the USABILITY ENGINEERING effort.....                                       | 23   |
| 7 Overview of the USABILITY ENGINEERING PROCESS.....                                      | 24   |
| 8 Prepare the USE SPECIFICATION.....  | 27   |
| 8.1 Initiate USE SPECIFICATION.....   | 27   |
| 8.2 Analyse the intended USERS, anticipated USER TASKS and intended USE ENVIRONMENTS..... | 28   |
| 8.2.1 Intended USERS.....   | 28   |
| 8.2.2 Anticipated USER TASKS.....   | 30   |
| 8.2.3 Intended USE ENVIRONMENT.....   | 30   |
| 8.3 Finalize the USE SPECIFICATION.....   | 30   |
| 8.4 Recommended methods for developing the USE SPECIFICATION.....                         | 31   |
| 8.4.1 General.....  | 31   |
| 8.4.2 Contextual inquiry and observation.....   | 31   |
| 8.4.3 Interview and survey techniques.....  | 31   |
| 8.4.4 Expert reviews.....   | 32   |
| 8.4.5 Advisory panel reviews.....   | 32   |
| 8.4.6 USABILITY TESTS.....  | 32   |

|        |  |    |
|--------|--|----|
| 9      | Identify USER INTERFACE characteristics related to SAFETY and potential USE  | 32 |
|        | ERRORS.....  | 32 |
| 9.1    | General.....   | 32 |
| 9.2    | TASK ANALYSIS .....  | 33 |
| 9.3    | FUNCTION ANALYSIS .....  | 33 |
| 9.4    | Identify and analyse known problems .....                                    | 35 |
| 10     | Identify known or foreseeable HAZARDS and HAZARDOUS SITUATIONS.....          | 35 |
| 11     | Identify and describe HAZARD-RELATED USE SCENARIOS.....                      | 36 |
| 11.1   | Define USE SCENARIOS.....  | 36 |
| 11.2   | USE SCENARIOS as they relate to RISK MANAGEMENT.....                         | 36 |
| 11.3   | Identify HAZARD-RELATED USE SCENARIOS.....                                   | 37 |
| 11.4   | Methods to define and analyse HAZARD-RELATED USE SCENARIOS .....             | 37 |
| 12     | Select the HAZARD-RELATED USE SCENARIOS for SUMMATIVE EVALUATION.....        | 38 |
| 12.1   | General.....   | 38 |
| 12.2   | Selection of the HAZARD-RELATED USE SCENARIOS based on SEVERITY.....         | 39 |
| 12.3   | Selection of HAZARD-RELATED USE SCENARIOS based on other circumstances ..... | 39 |
| 13     | Establish USER INTERFACE SPECIFICATION.....                                  | 40 |
| 13.1   | Development of the USER INTERFACE SPECIFICATION.....                         | 40 |
| 13.2   | ACCOMPANYING DOCUMENTATION and training .....                                | 40 |
| 14     | Establish USER INTERFACE EVALUATION plan .....                               | 41 |
| 14.1   | Specify how the USER INTERFACE design will be explored and evaluated.....    | 41 |
| 14.2   | FORMATIVE EVALUATION planning.....   | 42 |
| 14.3   | SUMMATIVE EVALUATION planning .....  | 42 |
| 14.4   | USABILITY TEST planning.....   | 43 |
| 14.5   | Example USABILITY TEST protocol and report.....                              | 43 |
| 15     | Design and implement the USER INTERFACE and training.....                    | 44 |
| 15.1   | General.....   | 44 |
| 15.2   | Develop conceptual model(s).....   | 46 |
| 15.3   | Design software USER INTERFACES (if applicable) .....                        | 47 |
| 15.3.1 | General .....  | 47 |
| 15.3.2 | Review USER INTERFACE REQUIREMENTS and constraints.....                      | 47 |
| 15.3.3 | Develop software USER INTERFACE structure(s) .....                           | 47 |
| 15.3.4 | Design wireframes .....  | 48 |
| 15.3.5 | Design screen templates .....  | 48 |
| 15.4   | Design hardware USER INTERFACES (if applicable).....                         | 48 |
| 15.4.1 | General .....  | 48 |
| 15.4.2 | Review USER INTERFACE REQUIREMENTS and constraints.....                      | 49 |
| 15.4.3 | Develop concept sketches.....  | 49 |
| 15.5   | Design materials necessary for training and training .....                   | 49 |
| 15.5.1 | General .....  | 49 |
| 15.5.2 | Training materials .....   | 49 |
| 15.5.3 | Training .....   | 51 |
| 15.6   | Develop detailed designs.....  | 52 |
| 15.7   | Verify the design of the USER INTERFACE.....                                 | 52 |

|        |  |    |
|--------|--|----|
| 16     | Perform FORMATIVE EVALUATIONS .....  | 52 |
| 16.1   | Conduct multiple FORMATIVE EVALUATIONS.....                                    | 52 |
| 16.2   | Recommended methods for FORMATIVE EVALUATION .....                             | 53 |
| 16.2.1 | General .....  | 53 |
| 16.2.2 | Conduct heuristic analysis.....  | 54 |
| 16.2.3 | Conduct cognitive walkthrough .....  | 54 |
| 16.2.4 | Conduct USABILITY TESTS .....  | 54 |
| 16.3   | Analysis of FORMATIVE EVALUATION results .....                                 | 55 |
| 17     | Perform SUMMATIVE EVALUATION .....   | 55 |
| 17.1   | General.....   | 55 |
| 17.2   | Conduct a SUMMATIVE EVALUATION .....   | 56 |
| 17.3   | Data collection .....  | 57 |
| 17.3.1 | General .....  | 57 |
| 17.3.2 | Observational data.....  | 57 |
| 17.3.3 | Subjective data .....  | 58 |
| 17.4   | Data analysis .....  | 59 |
| 18     | Document the USABILITY ENGINEERING project.....                                | 61 |
| 19     | POST-PRODUCTION review and analysis .....                                      | 61 |
|        | Annex A (informative) Recommended reading list.....                            | 64 |
|        | Annex B (informative) External resources to identify known problems .....      | 66 |
| B.1    | General.....   | 66 |
| B.2    | Austria .....  | 66 |
| B.3    | Germany .....  | 66 |
| B.4    | Sweden.....  | 67 |
| B.5    | Switzerland .....  | 67 |
| B.6    | United Kingdom .....   | 67 |
| B.7    | United States .....  | 67 |
|        | Annex C (informative) Developing USABILITY GOALS for commercial purposes ..... | 68 |
| C.1    | General.....   | 68 |
| C.2    | Objective goals .....  | 68 |
| C.3    | Subjective goals.....  | 69 |
|        | Annex D (informative) USABILITY ENGINEERING project end products.....          | 71 |
|        | Annex E (informative) USABILITY ENGINEERING methods .....                      | 73 |
| E.1    | General.....   | 73 |
| E.2    | Advisory panel reviews.....  | 74 |
| E.3    | Brainstorm USE SCENARIOS.....  | 75 |
| E.4    | Cognitive walkthrough .....  | 75 |
| E.5    | Contextual inquiry .....   | 75 |
| E.6    | Day-in-the-life analysis.....  | 76 |
| E.7    | Expert reviews .....   | 77 |
| E.8    | FMEA and FTA .....   | 77 |
| E.9    | Focus groups .....   | 78 |
| E.10   | FUNCTION ANALYSIS .....  | 78 |
| E.11   | Heuristic analysis.....  | 79 |
| E.12   | Observation .....  | 79 |
| E.13   | One-on-one interviews .....  | 79 |
| E.14   | Participatory design .....   | 80 |
| E.15   | PCA analysis .....   | 80 |

|                       |   |     |
|-----------------------|---|-----|
| E.16                  | SIMULATION.....   | 82  |
| E.17                  | Standards reviews.....  | 82  |
| E.18                  | Surveys .....   | 83  |
| E.19                  | TASK ANALYSIS .....   | 83  |
| E.20                  | Time-and-motion studies .....   | 84  |
| E.21                  | Workload assessment .....   | 84  |
| Annex F (informative) | USABILITY ENGINEERING studies in clinical settings .....  | 85  |
| F.1                   | General.....  | 85  |
| F.2                   | Sample study in the clinical environment .....  | 85  |
| Annex G (informative) | USER PROFILE.....   | 87  |
| Annex H (informative) | USE ENVIRONMENT descriptions .....  | 89  |
| Annex I (informative) | USER INTERFACE REQUIREMENTS .....   | 91  |
| Annex J (informative) | Model the USER INTERFACE .....  | 92  |
| J.1                   | General.....  | 92  |
| J.2                   | Develop preliminary prototype(s) .....  | 92  |
| J.3                   | Develop a refined prototype.....  | 92  |
| J.4                   | Develop a specification prototype .....   | 93  |
| J.5                   | Prepare a style guide .....   | 93  |
| Annex K (informative) | USABILITY TEST sample size .....  | 94  |
| Annex L (informative) | Identifying distinct USER groups .....  | 97  |
|                       | Bibliography .....  | 98  |
|                       | Index of defined terms .....  | 101 |
| Figure 1              | – Example of a USABILITY ENGINEERING project for a graphical USER INTERFACE .....   | 26  |
| Figure 2              | – Progression of a USER INTERFACE design from multiple concepts to a few concepts to a preferred concept .....  | 46  |
| Figure 3              | – Progression of concepts from multiple concepts to a few concepts to a preferred concept .....   | 50  |
| Figure E.1            | – Sample of a USE ENVIRONMENT within a hospital.....  | 76  |
| Figure E.2            | – Model of USER-MEDICAL DEVICE interaction .....  | 81  |
| Figure E.3            | – Infant manikin used in a neonatal care unit simulator (left), test participant simulating an auto-injector (centre) and an adult manikin used in a surgery SIMULATION (right) ..... | 82  |
| Figure E.4            | – Example hierarchical TASK ANALYSIS.....   | 84  |
| Figure J.1            | – USER INTERFACE designers using prototyping software to build and test a USER INTERFACE.....   | 93  |
| Figure K.1            | – Number of test participants needed in a USABILITY TEST for FORMATIVE EVALUATION .....   | 95  |
| Table 1               | – Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2.....   | 14  |
| Table 2               | – Human versus machine capabilities .....   | 34  |
| Table 3               | – Example of five qualitative SEVERITY levels (adapted from Table D.3 of ISO 14971:2007) .....  | 39  |

|   |    |
|---|----|
| Table 4 – Example outline of a USABILITY TEST protocol .....                  | 44 |
| Table 5 – Example outline of a USABILITY TEST report .....                    | 44 |
| Table 6 – USE ERRORS caused by sample USER INTERFACE design shortcomings..... | 55 |
| Table 7 – Sample USE ERRORS and their root causes.....                        | 60 |
| Table D.1 – USABILITY ENGINEERING project end products.....                   | 71 |
| Table E.1 – Recommended application of USABILITY methods.....                 | 74 |
| Table G.1 – Sample USER PROFILE .....   | 87 |
| Table H.1 – Sample USE ENVIRONMENT .....                                      | 89 |
| Table I.1 – Sample USER INTERFACE REQUIREMENTS .....                          | 91 |
| Table K.1 – Cumulative probability of detecting a USABILITY problem .....     | 96 |
