

# IEC/TR 62366-2:2016-04 (E)

## Medical devices - Part 2: Guidance on the application of usability engineering to medical devices

---

### Contents

	Page
FOREWORD.....	6
INTRODUCTION.....	8
1 Scope and purpose.....	9
1.1 Scope .....	9
1.2 Purpose .....	9
2 Normative references.....	10
3 Terms and definitions .....	11
4 Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2.....	14
5 Background and justification of the USABILITY ENGINEERING program .....	14
5.1 How SAFETY relates to USABILITY .....	14
5.2 Reasons to invest in USABILITY ENGINEERING .....	15
6 How to implement a USABILITY ENGINEERING program.....	16
6.1 Effective USABILITY ENGINEERING programs .....	16
6.2 Effective USABILITY ENGINEERING projects and plans .....	16
6.3 Apply an appropriate level of USABILITY ENGINEERING expertise .....	17
6.4 Ensure the necessary resources are available and well timed .....	18
6.5 RISK MANAGEMENT as it relates to USABILITY ENGINEERING .....	18
6.5.1 RISK ANALYSIS.....	18
6.5.2 RISK CONTROL.....	19
6.5.3 Information for SAFETY .....	20
6.5.4 Overall evaluation of RESIDUAL RISK .....	22
6.6 USABILITY ENGINEERING FILE.....	22
6.7 Tailoring the USABILITY ENGINEERING effort.....	23
7 Overview of the USABILITY ENGINEERING PROCESS.....	24
8 Prepare the USE SPECIFICATION .....	27
8.1 Initiate USE SPECIFICATION .....	27
8.2 Analyse the intended USERS, anticipated USER TASKS and intended USE ENVIRONMENTS .....	28
8.2.1 Intended USERS .....	28
8.2.2 Anticipated USER TASKS .....	30
8.2.3 Intended USE ENVIRONMENT .....	30
8.3 Finalize the USE SPECIFICATION .....	30
8.4 Recommended methods for developing the USE SPECIFICATION .....	31
8.4.1 General .....	31
8.4.2 Contextual inquiry and observation.....	31
8.4.3 Interview and survey techniques.....	31
8.4.4 Expert reviews .....	32
8.4.5 Advisory panel reviews.....	32
8.4.6 USABILITY TESTS .....	32

9	Identify USER INTERFACE characteristics related to SAFETY and potential USE ERRORS.....	32
9.1	General.....	32
9.2	TASK ANALYSIS .....	33
9.3	FUNCTION ANALYSIS .....	33
9.4	Identify and analyse known problems .....	35
10	Identify known or foreseeable HAZARDS and HAZARDOUS SITUATIONS.....	35
11	Identify and describe HAZARD-RELATED USE SCENARIOS.....	36
11.1	Define USE SCENARIOS.....	36
11.2	USE SCENARIOS as they relate to RISK MANAGEMENT.....	36
11.3	Identify HAZARD-RELATED USE SCENARIOS.....	37
11.4	Methods to define and analyse HAZARD-RELATED USE SCENARIOS .....	37
12	Select the HAZARD-RELATED USE SCENARIOS for SUMMATIVE EVALUATION.....	38
12.1	General.....	38
12.2	Selection of the HAZARD-RELATED USE SCENARIOS based on SEVERITY.....	39
12.3	Selection of HAZARD-RELATED USE SCENARIOS based on other circumstances .....	39
13	Establish USER INTERFACE SPECIFICATION.....	40
13.1	Development of the USER INTERFACE SPECIFICATION.....	40
13.2	ACCOMPANYING DOCUMENTATION and training .....	40
14	Establish USER INTERFACE EVALUATION plan .....	41
14.1	Specify how the USER INTERFACE design will be explored and evaluated.....	41
14.2	FORMATIVE EVALUATION planning.....	42
14.3	SUMMATIVE EVALUATION planning .....	42
14.4	USABILITY TEST planning.....	43
14.5	Example USABILITY TEST protocol and report .....	43
15	Design and implement the USER INTERFACE and training .....	44
15.1	General.....	44
15.2	Develop conceptual model(s).....	46
15.3	Design software USER INTERFACES (if applicable) .....	47
15.3.1	General .....	47
15.3.2	Review USER INTERFACE REQUIREMENTS and constraints .....	47
15.3.3	Develop software USER INTERFACE structure(s) .....	47
15.3.4	Design wireframes .....	48
15.3.5	Design screen templates .....	48
15.4	Design hardware USER INTERFACES (if applicable) .....	48
15.4.1	General .....	48
15.4.2	Review USER INTERFACE REQUIREMENTS and constraints .....	49
15.4.3	Develop concept sketches.....	49
15.5	Design materials necessary for training and training .....	49
15.5.1	General .....	49
15.5.2	Training materials .....	49
15.5.3	Training .....	51
15.6	Develop detailed designs.....	52
15.7	Verify the design of the USER INTERFACE.....	52

16	Perform FORMATIVE EVALUATIONS .....	52
16.1	Conduct multiple FORMATIVE EVALUATIONS.....	52
16.2	Recommended methods for FORMATIVE EVALUATION .....	53
16.2.1	General .....	53
16.2.2	Conduct heuristic analysis.....	54
16.2.3	Conduct cognitive walkthrough .....	54
16.2.4	Conduct USABILITY TESTS .....	54
16.3	Analysis of FORMATIVE EVALUATION results .....	55
17	Perform SUMMATIVE EVALUATION .....	55
17.1	General.....	55
17.2	Conduct a SUMMATIVE EVALUATION .....	56
17.3	Data collection .....	57
17.3.1	General .....	57
17.3.2	Observational data.....	57
17.3.3	Subjective data .....	58
17.4	Data analysis .....	59
18	Document the USABILITY ENGINEERING project.....	61
19	POST-PRODUCTION review and analysis .....	61
	Annex A (informative) Recommended reading list .....	64
	Annex B (informative) External resources to identify known problems .....	66
B.1	General.....	66
B.2	Austria .....	66
B.3	Germany .....	66
B.4	Sweden.....	67
B.5	Switzerland .....	67
B.6	United Kingdom .....	67
B.7	United States .....	67
	Annex C (informative) Developing USABILITY GOALS for commercial purposes .....	68
C.1	General.....	68
C.2	Objective goals .....	68
C.3	Subjective goals.....	69
	Annex D (informative) USABILITY ENGINEERING project end products .....	71
	Annex E (informative) USABILITY ENGINEERING methods .....	73
E.1	General.....	73
E.2	Advisory panel reviews.....	74
E.3	Brainstorm USE SCENARIOS.....	75
E.4	Cognitive walkthrough .....	75
E.5	Contextual inquiry .....	75
E.6	Day-in-the-life analysis.....	76
E.7	Expert reviews .....	77
E.8	FMEA and FTA .....	77
E.9	Focus groups .....	78
E.10	FUNCTION ANALYSIS .....	78
E.11	Heuristic analysis.....	79
E.12	Observation .....	79
E.13	One-on-one interviews .....	79
E.14	Participatory design .....	80
E.15	PCA analysis .....	80

E.16	SIMULATION.....	82
E.17	Standards reviews.....	82
E.18	Surveys .....	83
E.19	TASK ANALYSIS .....	83
E.20	Time-and-motion studies .....	84
E.21	Workload assessment .....	84
Annex F (informative)	USABILITY ENGINEERING studies in clinical settings .....	85
F.1	General.....	85
F.2	Sample study in the clinical environment .....	85
Annex G (informative)	USER PROFILE.....	87
Annex H (informative)	USE ENVIRONMENT descriptions .....	89
Annex I (informative)	USER INTERFACE REQUIREMENTS .....	91
Annex J (informative)	Model the USER INTERFACE .....	92
J.1	General.....	92
J.2	Develop preliminary prototype(s) .....	92
J.3	Develop a refined prototype.....	92
J.4	Develop a specification prototype .....	93
J.5	Prepare a style guide .....	93
Annex K (informative)	USABILITY TEST sample size .....	94
Annex L (informative)	Identifying distinct USER groups .....	97
Bibliography .....	98	
Index of defined terms .....	101	
 Figure 1 – Example of a USABILITY ENGINEERING project for a graphical USER INTERFACE .....	26	
Figure 2 – Progression of a USER INTERFACE design from multiple concepts to a few concepts to a preferred concept .....	46	
Figure 3 – Progression of concepts from multiple concepts to a few concepts to a preferred concept .....	50	
Figure E.1 – Sample of a USE ENVIRONMENT within a hospital.....	76	
Figure E.2 – Model of USER-MEDICAL DEVICE interaction .....	81	
Figure E.3 – Infant manikin used in a neonatal care unit simulator (left), test participant simulating an auto-injector (centre) and an adult manikin used in a surgery SIMULATION (right) .....	82	
Figure E.4 – Example hierarchical TASK ANALYSIS.....	84	
Figure J.1 – USER INTERFACE designers using prototyping software to build and test a USER INTERFACE.....	93	
Figure K.1 – Number of test participants needed in a USABILITY TEST for FORMATIVE EVALUATION .....	95	
 Table 1 – Mapping between the requirements of IEC 62366-1 and the guidance of IEC TR 62366-2.....	14	
Table 2 – Human versus machine capabilities .....	34	
Table 3 – Example of five qualitative SEVERITY levels (adapted from Table D.3 of ISO 14971:2007) .....	39	

Table 4 – Example outline of a USABILITY TEST protocol .....	44
Table 5 – Example outline of a USABILITY TEST report .....	44
Table 6 – USE ERRORS caused by sample USER INTERFACE design shortcomings.....	55
Table 7 – Sample USE ERRORS and their root causes.....	60
Table D.1 – USABILITY ENGINEERING project end products.....	71
Table E.1 – Recommended application of USABILITY methods .....	74
Table G.1 – Sample USER PROFILE .....	87
Table H.1 – Sample USE ENVIRONMENT .....	89
Table I.1 – Sample USER INTERFACE REQUIREMENTS .....	91
Table K.1 – Cumulative probability of detecting a USABILITY problem .....	96
