FOREWORD 4
INTRODUCTION 5
1 Scope 7
2 Normative references 7
3 Terms, definitions and abbreviated terms 8
3.1 Terms and definitions 8
3.2 Abbreviated terms 8
4 Conformance 9
5 Overview of IGRS remote media access profile 9
6 Application scenarios of remote media access 9
7 Remote media access application system 10
7.1 Overview 10
7.2 IGRS RAMS 10
7.3 IGRS RAMC 12
7.4 Extension of RAMS and RAMC modules 13
8 Message data format of remote media access application 13
8.1 Classification of message and data format 13
Annex A (normative) Specification of MTS 15
A.1 Overview 15
A.2 MTS service type 15
A.3 MTS interface invocation reference flow 15
A.4 MTS service attributes 16
A.5 MTS data types 16
A.6 MTS invocation interfaces 16
A.6.1 PrepareForTranscoding 16
A.6.2 StartTranscoding 17
A.6.3 StopTranscoding 17
A.6.4 GetTranscodingStatus 17
A.6.5 MTS error codes 18
Annex B (normative) Web Services Description Language (WSDL) description of MTS 19
Bibliography 22

Figure 1 – Interaction model of IGRS RA media access application 10
Figure 2 – Components of IGRS RAMS 11
Figure 3 – Components of IGRS RAMC 12
Figure 4 – Extension of RAMS and RAMC modules 13
Message 1 – Format of request message 14
Message 2 – Format of response message 14
Message 3 – Format of push message 14
Figure A.1 – Service invocation flow of MTS 15

Table A.1 – MTS service attributes 16
Table A.2 – MTS data types 16
Table A.3 – Input/Output parameters of PrepareForTranscoding 17
Table A.4 – Input/Output parameters of StartTranscoding 17
Table A.5 – Input/Output parameters of StopTranscoding 17
Table A.6 – Input/Output parameters of GetTranscodingStatus 18
Table A.7 – MTS error codes 18
