## ISO/IEC 23544:2021 (E)

## Information Technology — Data centres — Application Platform Energy Effectiveness (APEE)

## **Contents**

|                                 |                                     | Forew  | oreword  |  |
|---------------------------------|-------------------------------------|--|--|--|
|                                 |                                     | Introd   | uction   |  |
| 1                               | Scope                               |  |  |  |
| 2                               |                                     | Normative references   |  |  |
| 3                               |                                     | Terms, definitions and abbreviated terms   |  |  |
|                                 | 3.1<br>3.2                          |  | Terms and definitions Abbreviated terms  |  |
| 4                               | Relevance of APEE                   |  | ince of APEE   |  |
| 5                               |                                     | Determination of APEE  |  |  |
| 6                               |                                     | Determination of application outcome and energy consumption of the application platform for APEE |  |  |
|                                 | 6.1<br>6.2<br>6.3<br>6.3.1<br>6.3.2 |  | Prerequisites for the benchmark and application platform  Determination of application outcome  Determination of energy consumption of the application platform  Requirements for obtaining energy consumption of the application platform  Requirements for the measurement method for obtaining energy consumption |  |
| 7                               |                                     | Report   | porting of APEE  |  |
|                                 | 7.1<br>7.2                          |  | Requirements Recommendations   |  |
| Annex                           | Α                                   | (inforn  | native) Use cases of APEE  |  |
|                                 | A.1<br>A.2                          |  | Introduction Use cases   |  |
| Annex                           | В                                   | (inforn  | native) Example of APEE calculation  |  |
| Annex                           | C                                   | (inforn  | native) Example of an APEE report  |  |
| C.1<br>C.2<br>C.2<br>C.2<br>C.2 |                                     | 1<br>2   | Example of an APEE report using TPC-H as benchmark Measurement example on two application platforms with different middleware General Example of an APEE report for application platform A Example of an APEE report of application platform B   |  |
| Annex                           | D                                   | (inforn  | native) Examples of acceptable benchmarks  |  |
|                                 | D.1<br>D.2                          |  | Introduction Examples of benchmarks  |  |
