ISO 8529-2:2000-08 (E)

Reference neutron radiations - Part 2: Calibration fundamentals of radiation protection devices re lated to the basic quantities characterizing the radiation field

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms, definitions and symbols 2

4 Calibration and traceability of the reference radiation field 4

5 Calibration principles for calibrations with radionuclide neutron sources 5

6 Correction for scattering effects for radionuclide sources 8

7 Linearity determination 15

8 Calibrations using accelerators and reactors 15

9 Special considerations for personal dosimeters 18

10 Uncertainties 18

Annex B (informative) Minimum room lengths for 40 % room return (reference [11]) 24

Annex C (normative) Air-attenuation correction factors 25

Annex D (informative) Total air-scatter correction 26

Annex E (informative) Criteria for construction and use of shadow cones 27

Annex F (informative) Illustration of the parameters and variables for the reduced-fitting method 29
