## Reference neutron radiations - Part 2: Calibration fundamentals of radiation protection devices related to the basic quantities characterizing the radiation field

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms, definitions and symbols .....	2
4	Calibration and traceability of the reference radiation field .....	4
5	Calibration principles for calibrations with radionuclide neutron sources .....	5
6	Correction for scattering effects for radionuclide sources .....	8
7	Linearity determination .....	15
8	Calibrations using accelerators and reactors .....	15
9	Special considerations for personal dosimeters .....	18
10	Uncertainties .....	18
	Annex B (informative) Minimum room lengths for 40 % room return (reference [11]) .....	24
	Annex C (normative) Air-attenuation correction factors .....	25
	Annex D (informative) Total air-scatter correction .....	26
	Annex E (informative) Criteria for construction and use of shadow cones .....	27
	Annex F (informative) Illustration of the parameters and variables for the reduced-fitting method .....	29
	Bibliography .....	30
