ISO 20956:2023-09 (E)

Radiological protection - Low dose rate calibration of instruments for environmental and area monitoring

Contents

Page

Foreword ... **iv**

Introduction ... **v**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **1**

4 Symbols ... **3**

5 Calibration methods under laboratory conditions ... **3**

5.1 Characterization of the radiation field using a reference source ... 3

5.1.1 General ... 3

5.1.2 Characterization procedure of the reference radiation field ... 3

5.1.3 Characterization procedure of the radiation field at a distance *r* ... 4

5.1.4 Uncertainty for the calibration of the radiation field using the reference source ... 4

5.2 Ground level facilities with normal background dose levels ... 4

5.2.1 General ... 4

5.2.2 Dose equivalent rate evaluation using the inverse square of distance ... 4

5.2.3 Detector calibration procedure ... 5

5.2.4 Uncertainty contributions to the detector calibration uncertainty ... 5

5.3 Ground level facilities with added shielding at lower than normal background levels ... 5

5.3.1 General ... 5

5.3.2 Description of the ground level facility with added shielding ... 5

5.3.3 Detector calibration procedure ... 5

5.3.4 Uncertainty contributions to the detector calibration uncertainty ... 6

5.4 Underground facilities with ultra-low background dose levels ... 6

5.4.1 General ... 6

5.4.2 Description of the facility ... 6

5.4.3 Uncertainty contributions to the detector calibration uncertainty ... 6

6 Routine checking ... **7**

6.1 General ... 7

6.2 Description of the method ... 7

6.2.1 Introduction ... 7

6.2.2 Irradiation setup for regular checking ... 7

6.2.3 Criteria for routine checks ... 7

7 On-site calibration ... **8**

7.1 General ... 8

7.2 The method using a portable calibrated radioactive source ... 8

7.2.1 General ... 8

7.2.2 Portable calibrated radioactive source ... 8

7.2.3 Procedure of calibration ... 8

7.2.4 Uncertainty contributions to the detector calibration uncertainty ... 8

7.3 The method using a reference standard instrument ... 8

7.3.1 General ... 8

7.3.2 The calibration instruments ... 9

7.3.3 Uncertainty contributions ... 9

Annex A (informative) **Example of a ground level facility with added shielding** **10**

Annex B (informative) **Reference sites for characterization of environmental dosemeters with respect to background ionizing radiation in the environment** **12**

Bibliography **14**
