

ISO 20956:2023-09 (E)

Radiological protection - Low dose rate calibration of instruments for environmental and area monitoring

Contents		Page
Foreword		iv
Introduction		v
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 Symbols		3
5 Calibration methods under laboratory conditions		3
5.1 Characterization of the radiation field using a reference source.....		3
5.1.1 General.....		3
5.1.2 Characterization procedure of the reference radiation field.....		3
5.1.3 Characterization procedure of the radiation field at a distance r		4
5.1.4 Uncertainty for the calibration of the radiation field using the reference source.....		4
5.2 Ground level facilities with normal background dose levels.....		4
5.2.1 General.....		4
5.2.2 Dose equivalent rate evaluation using the inverse square of distance.....		4
5.2.3 Detector calibration procedure.....		5
5.2.4 Uncertainty contributions to the detector calibration uncertainty.....		5
5.3 Ground level facilities with added shielding at lower than normal background levels.....		5
5.3.1 General.....		5
5.3.2 Description of the ground level facility with added shielding.....		5
5.3.3 Detector calibration procedure.....		5
5.3.4 Uncertainty contributions to the detector calibration uncertainty.....		6
5.4 Underground facilities with ultra-low background dose levels.....		6
5.4.1 General.....		6
5.4.2 Description of the facility.....		6
5.4.3 Uncertainty contributions to the detector calibration uncertainty.....		6
6 Routine checking		7
6.1 General.....		7
6.2 Description of the method.....		7
6.2.1 Introduction.....		7
6.2.2 Irradiation setup for regular checking.....		7
6.2.3 Criteria for routine checks.....		7
7 On-site calibration		8
7.1 General.....		8
7.2 The method using a portable calibrated radioactive source.....		8
7.2.1 General.....		8
7.2.2 Portable calibrated radioactive source.....		8
7.2.3 Procedure of calibration.....		8
7.2.4 Uncertainty contributions to the detector calibration uncertainty.....		8
7.3 The method using a reference standard instrument.....		8
7.3.1 General.....		8
7.3.2 The calibration instruments.....		9
7.3.3 Uncertainty contributions.....		9

Annex A (informative) Example of a ground level facility with added shielding..... 10
**Annex B (informative) Reference sites for characterization of environmental doseimeters
with respect to background ionizing radiation in the environment..... 12**
Bibliography..... 14
