

DIN EN ISO 15502:2006-01 (E)

Household refrigerating appliances - Characteristics and test methods (ISO 15502:2005)

Contents		Page
Foreword		2
1	Scope	4
2	Normative references	4
3	Terms, definitions and symbols	4
4	Classification	11
5	Materials, design and manufacture	11
6	Storage temperatures	13
7	Determination of linear dimensions, volumes and areas	15
8	General test conditions	21
9	Testing air-tightness of doors, lids or drawer seals	28
10	Testing opening force of doors or lids	28
11	Testing the durability of doors, lids and drawers	28
12	Testing mechanical strength of shelves and similar components	31
13	Testing storage temperatures	32
14	Water vapour condensation test	35
15	Energy consumption test	36
16	Temperature rise test	42
17	Freezing test	43
18	Ice-making test	47
19	Final test report	50
20	Designation	50
21	Marking	51
22	Technical and commercial product information	53
23	Instructions for users	54
Annex A (informative) Conditions particular to certain countries		75
Annex B (informative) Percentage running time		77

Annex C (informative) Test for absence of taste and odour	78
Annex D (normative) Built-in refrigerating appliances	81
Annex E (informative) Rated characteristics and control procedure	82
Bibliography	84
