Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Definitions 2

4 Symbols and abbreviations (optional) 5

5 General requirements for non-implantable parts 5

6 Measurement of IMPLANTABLE PULSE GENERATOR and LEAD characteristics 5

7 General arrangement of the packaging 19

8 General markings for active implantable medical devices 19

9 Markings on the sales packaging 19

10 Construction of the sales packaging 20

11 Markings on the sterile pack 21

12 Construction of the non-reusable pack 22

13 Markings on the active implantable medical device 22

14 Protection from unintentional biological effects being caused by the active implantable medical device 23

15 Protection from harm to the patient or user caused by external physical features of the active implantable medical device 23

16 Protection from harm to the patient caused by electricity 23

17 Protection from harm to the patient caused by heat 24

18 Protection from ionizing radiation released or emitted from the active implantable medical device 24

19 Protection from unintended effects caused by the device 24

20 Protection of the device from damage caused by external defibrillators 25

21 Protection of the device from changes caused by high power electrical fields applied directly to the patient 26

22 Protection of the active implantable medical device from changes caused by miscellaneous medical treatments 26

23 Protection of the active implantable medical device from mechanical forces 26

24 Protection of the active implantable medical device from damage caused by electrostatic discharge 31

25 Protection of the active implantable medical device from damage caused by atmospheric pressure changes 31

26 Protection of the active implantable medical device from damage caused by temperature changes 31

27 Protection of the active implantable medical device from electromagnetic non-ionizing radiation 31

28 Accompanying documentation 45

Annexes Annex A (informative) Relationship between the fundamental principles in ISO/TR 14283 and the clauses of this standard 50

Annex B (informative) Relationship between the clauses of this standard and the fundamental principles listed in Annex A 72

Annex D (informative) Code for describing modes of IMPLANTABLE PULSE GENERATORS 85

Annex E (informative) 89

Annex F (normative) Pulse Forms 90

Annex G (normative) Interface circuits 91

Annex H (informative) Selection of capacitor CX 94

Annex I (normative) Calibration of the injection network, Figure G.104 95
