FOREWORD 8
INTRODUCTION 9

1 Scope ... **11**

2 Normative references ... **11**
2.1 Overview ... 11
2.2 International Standards ... 11
2.3 Other references ... 12

3 Definitions and conventions ... **13**
3.1 Definitions ... 13
3.2 Editorial conventions ... 20
3.2.1 Abbreviations, acronyms and symbols ... 21
3.2.2 signaling rate abbreviations ... 21
3.2.3 Synonyms ... 21
3.2.4 Acronyms and other abbreviations ... 22
3.3 Symbols ... 23

4 Structure and concepts ... **24**
4.1 General ... 24
4.2 FC-0 general description ... 25
4.3 FC-0 interface overview ... 27
4.4 Data flow stages ... 28

5 FC-PI functional characteristics ... **29**
5.1 General ... 29
5.2 General characteristics ... 29
5.3 FC-0 States ... 30
5.3.1 Transmitter FC-0 states ... 30
5.3.2 Receiver States ... 30
5.4 Response to input data phase jumps ... 30
5.5 Limitations on invalid code ... 31
5.6 Receiver initialization time ... 31
5.7 Loss of signal (Rx_LOS) function ... 31
5.8 Speed agile Ports that support Speed Negotiation ... 31
5.9 FC-PI nomenclature ... 32
5.10 Interoperability points ... 32
5.11 FC-PI technology options ... 40

6 Optical interface specification ... **41**
6.1 General ... 41
6.2 Laser safety issues ... 41
6.3 SM data links ... 41
6.3.1 General ... 41
6.3.2 SM optical output interface ... 41
6.3.3 SM optical input interface ... 44
6.3.4 SM jitter budget ... 44
6.3.5 SM trade-offs ... 47
6.4 MM data links ... 49
6.4.1 General ... 49
6.4.2 MM optical output interface ... 49
6.4.3 MM optical input interface ... 53
6.4.4 MM jitter budget ... 53

7 Optical interface receptacle specifications **55**
7.1 Optical interface general information 55
7.2 SC optical interface 55
7.2.1 SC performance information 55
7.2.2 SC optical plug 55
7.2.3 SC Duplex optical receptacle 56
7.3 SG optical interface 56
7.4 LC optical interface 57
7.5 MT-RJ optical interface 58
7.6 MU connector 58

8 Optical fibre cable plant specification **59**
8.1 SM cable plant specification 59
8.1.1 SM optical fibre type 59
8.1.2 SM cable plant loss budget 59
8.1.3 SM optical return loss 59
8.2 MM cable plant specification 59
8.2.1 General 59
8.2.2 MM optical fibre types 60
8.2.3 MM modal bandwidth 60
8.2.4 MM cable plant loss budget 60
8.2.5 MM optical return loss 61
8.3 Connectors and splices 61

9 Electrical cable interface specification **62**
9.1 General 62
9.2 Transmitted signal characteristics. 62
9.3 Received signal characteristics 64
9.4 Jitter characteristics 65
9.5 Eye masks 67
9.5.1 General 67
9.5.2 Transmitted eye mask at $\beta_{\mathbf{T}}$, $\delta_{\mathbf{T}}$ and $\gamma_{\mathbf{T}}$. 67
9.5.3 Received eye mask at $\beta_{\mathbf{R}}$, $\delta_{\mathbf{R}}$ and $\gamma_{\mathbf{R}}$. 68
9.5.4 Jitter tolerance masks 68
9.6 Impedance specifications 70
9.7 Electrical TxRx Connections 71
9.8 Compliance points 71
9.9 Driver characteristics 72
9.10 Receiver characteristics 73
9.11 Example TxRx Connections 74

10 Electrical cable plant and connector specifications **75**
10.1 General 75
10.2 Shielding 75
10.3 Cable interoperability 75
10.4 Unbalanced cable connectors 75
10.4.1 Inter-enclosure connectors for unbalanced cable 75
10.4.2 Intra-enclosure connectors for unbalanced cable 76
10.5 Balanced cable connectors 77
10.5.1 General 77
10.5.2 Inter-enclosure connectors for balanced cable 77
10.5.3 Intra-enclosure connectors for balanced cable 79
10.5.4 Non-device inter-enclosure connectors 81

Annex A (informative) **Test methods** **82**

Annex B (informative) **SERDES electrical interface example** **91**

Annex C (normative) **Optical cable plant usage** **100**

Annex D (normative) **Tx-Off and Rx-Loss of Signal detection** **102**
