ISO 4986:2010-03 (E)

Steel castings - Magnetic particle inspection

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Ordering information 1

4 Method of inspection 2
4.1 Operating mode 2
4.2 Qualification of the operators 2
4.3 Surface preparation 2
4.4 Conditions of inspection 3

5 Acceptance criteria 3
5.1 Definition of magnetic-inspection indications 3
5.1.1 General 3
5.1.2 Non-linear indications (SM) 3
5.1.3 Linear indications (LM) 3
5.2 Severity levels 3
5.2.1 General 3
5.2.2 Non-linear indications 3
5.2.3 Linear and aligned indications 4
5.2.4 Selection of the severity level 4
5.2.5 Designation of severity levels 4

6 Classification of the indications and interpretation of results 5
6.1 Classification of the indications using Tables 1 and 2 5
6.1.1 General 5
6.1.2 Non-linear indications 5
6.1.3 Linear and aligned indications 5
6.2 Interpretation of results 5

7 Cleaning after examination and demagnetization 5

8 Inspection documents 5

Annex A (informative) Recommended surface finish for magnetic particle inspection 8

Annex B (informative) Reference figures -- Non-linear indications (SM) 9

Annex C (informative) Reference figures -- Linear (LM) and aligned (AM) indications 14

Annex D (informative) Model of a magnetic particle inspection document 29
