ISO 14284:1996-07 (E)

Steel and iron - Sampling and preparation of samples for the determination of chemical composition

Contents

Page

1 Scope 1

2 Normative references 1

3 Definitions 1

4 Requirements for sampling and sample preparation 2
4.1 General 2
4.2 Sample 2
4.3 Selection of a sample 4
4.4 Preparation of a sample 5
4.5 Safety precautions 7

5 Liquid iron for steelmaking and pig-iron production 7
5.1 General 7
5.2 Spoon sampling 7
5.3 Probe sampling 8
5.4 Preparation of a sample for analysis 8

6 Liquid iron for cast iron production 8
6.1 General 8
6.2 Spoon sampling 9
6.3 Probe sampling 10
6.4 Preparation of a sample for analysis 11
6.5 Sampling and sample preparation for the determination of oxygen, nitrogen and hydrogen 12

7 Liquid steel for steel production 12
7.1 General 12
7.2 Spoon sampling 12
7.3 Probe sampling 13
7.4 Preparation of a sample for analysis 13
7.5 Sampling and sample preparation for the determination of oxygen 14
7.6 Sampling and sample preparation for the determination of hydrogen 14

8 Pig-irons 15
8.1 General 15
8.2 Increment sampling 15
8.3 Preparation of a sample for analysis 16

9 Cast-iron products 17
9.1 General 17
9.2 Sampling and sample preparation 18

10 Steel products 19

10.1 General 19

10.2 Selection of a preliminary sample or a sample for analysis from a cast product 19

10.3 Selection of a preliminary sample or a sample for analysis from a wrought product 19

10.4 Preparation of a sample for analysis 21

10.5 Sampling of leaded steel 22

10.6 Sampling and sample preparation for the determination of oxygen 22

10.7 Sampling and sample preparation for the determination of hydrogen 22

Annexes

A Sampling probes for use with liquid iron and steel 24

B Sampling probes for use with liquid steel for the determination of hydrogen 29
