DIN EN 10314:2016-10 (E)

Method for the derivation of minimum values of proof strength of steel at elevated temperatures

Contents

Page

European foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and abbreviations 5

5 Method 6
5.1 Input data groups 6
5.2 Ratio values 6
5.3 Minimum proof strength values 6
5.4 Minimum yield strength values 7

6 Application of the method 7
6.1 Representative data groups 7
6.2 Number of data 8
6.3 Consistency of data 8
6.4 Result 8

Annex A (informative) Significant changes to the previous version EN 10314:2002 10
