DIN EN 10225-3:2019-11 (E)

Weldable structural steels for fixed offshore structures - Technical de livery conditions - Part 3: Hot finished hollow sections

Contents

Page

European foreword 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 8

4 Classification and designation 10
4.1 Classification 10
4.2 Designation 10

5 Information to be supplied by the purchaser 11
5.1 Mandatory information 11
5.2 Options 11
5.3 Example of an order 11

6 Manufacturing process 11
6.1 Steel manufacturing process 11
6.2 Structural hollow section manufacturing process 12
6.3 Qualification of personnel for NDT activities 12
6.4 Delivery condition 12

7 Requirements 12
7.1 General 12
7.2 Chemical composition 12
7.2.1 Heat analysis 12
7.2.2 Product analysis 13
7.2.3 Carbon equivalent values (CEV) and P_{cm} 13
7.3 Mechanical properties 13
7.3.1 General 13
7.3.2 Post weld heat treatment (PWHT) 13
7.3.3 Through thickness testing 13
7.3.4 Flattening test 13
7.3.5 Prequalification for arctic areas 13
7.4 Weldability data 14
7.5 Internal soundness and non-destructive testing 14
7.5.1 Non-destructive testing of the weld seam of HFW hollow sections 14
7.5.2 Non-destructive testing of seamless hollow sections for longitudinal imperfections 14
7.5.3 Laminar discontinuities of hollow sections 14
7.6 Surface quality 15
7.7 Dimensions, tolerances, mass 15
7.7.1 Dimensions and tolerances on dimensions and shape 15
7.7.2 Mass of steel 15

8 Inspection 15
8.1 General 15
8.2 Types of inspection documents 15
8.3 Summary of inspections 16
8.4 Intermediary supply 17

9 Frequency of testing and preparation of samples and test pieces 17
9.1 Frequency of test 17

9.1.1 Chemical analysis 17
9.1.2 Tensile test and impact test 17
9.1.3 Testing the weld seam of welded hollow sections 17
9.1.4 Testing of the corner regions for rectangular hollow sections 17
9.2 Selection and preparation of samples for product analysis 18
9.3 Location of samples and orientation of tensile test pieces 18
9.4 Location of samples and orientation of impact test pieces 18
9.5 Preparation of test pieces for mechanical tests 18
9.5.1 General 18
9.5.2 Preparation of tensile test pieces 19
9.5.3 Preparation of impact test pieces 19

10 Test methods 19
10.1 Chemical analysis 19
10.2 Mechanical tests 20
10.2.1 Test temperatures 20
10.2.2 Tensile test 20
10.2.3 Impact test 20
10.3 Visual inspection and dimensional check 21
10.4 Non-destructive tests 21
10.4.1 General 21
10.4.2 NDT for the weld seam of HFW hollow sections 21
10.4.3 Full peripheral NDT for seamless hollow sections 21
10.4.4 Ultrasonic testing for laminar imperfections 21
10.4.5 NDT for surface quality 21
10.5 Retests, sorting and reprocessing 21

11 Marking and bundling 21
11.1 Die stamping and paint marking 21
11.2 Bundling 22

12 Options 22

Annex A (normative when Option 1 is specified by the purchaser) Further details of steel manufacturing procedures to be supplied by the manufacturer 35

Annex B (normative when Option 17 is specified by the purchaser) Weldability testing and mechanical testing of butt welds 36

B.1 General requirements 36

B.2 Welding processes and procedure 36

B.3 Butt-weld requirements 37

B.3.1 General 37

B.3.2 Test piece dimensions 37

B.3.3 Bevel detail 38

B.3.4 Welding processes 39

B.3.5 Nominal heat input 39

B.3.6 Heat treatment 39

B.3.7 Dehydrogenation of test pieces 40

B.4 Mechanical testing 40

B.4.1 General 40

B.4.2 Charpy V-notch impact tests 41
B.4.3 Fracture mechanic test 42
B.4.4 Macrohardness 43
B.4.5 Cross-weld tensile test 44
Annex C (normative when Option 17 is specified by the purchaser) Weldability testing - Bead-on-plate 49
C.1 General 49
C.2 Test material dimension 49
C.3 Welding method 49
C.4 Test condition 49
C.5 Specific test requirements: macrosection and hardness tests 50
Annex D (normative when Option 17 is specified by the purchaser) Weldability testing – Controlled thermal severity tests (CTS) 52
D.1 General 52
D.2 Test block dimensions 52
D.3 General welding details 52
D.3.1 Anchor welds 52
D.3.2 Test welds 52
D.4 Evaluation of the test welds 53
D.5 Hardness testing 53
Annex E (informative) Prequalification of steels for offshore structures operating in arctic areas 59
