

ISO 630-6:2023-11 (E)

Structural steels - Part 6: Technical delivery conditions for seismic-proof improved structural steels for building

Contents	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Classification and designation	2
4.1 Classification	2
4.2 Designation (grades and qualities)	2
5 Information to be supplied by purchaser	2
5.1 Mandatory information	2
5.2 Options	2
6 Requirements	2
6.1 Steel-making process	2
6.2 Delivery condition	3
6.3 Chemical composition	3
6.3.1 Heat analysis	3
6.3.2 Product analysis	3
6.3.3 Carbon equivalent value (CEV) or parameter crack measurement (PCM)	4
6.3.4 Carbon equivalent value (CEV) or parameter crack measurement (PCM) for steel products by thermomechanical controlled process	5
6.4 Mechanical properties	6
6.4.1 Tensile properties	6
6.4.2 Charpy V-notch impacts test	6
6.4.3 Through thickness characteristics	6
6.5 Surface conditions	7
6.6 Internal soundness	7
6.7 Dimensions, tolerances on dimensions and shape, mass	8
7 Inspection	9
8 Sampling -- Frequency of testing	9
8.1 Verification	9
8.2 Test units	9
8.2.1 Tensile tests	9
8.2.2 Impact tests	9
8.2.3 Through-thickness characteristics test	10
9 Test methods	10
10 Marking	10
Annex A (normative) Shapes and dimensions tolerances of H-sections	11
Annex B (informative) The formula of carbon equivalent and the maximum carbon equivalent value	15
Bibliography	17
