## Steel - Determination of Mo, Nb and W contents in alloyed steel - Inductively coupled plasma atomic emission spectrometric method - Part 2: Determination of Nb content

---

Contents	Page
<b>Foreword</b> .....	iv
1 <b>Scope</b> .....	1
2 <b>Normative references</b> .....	1
3 <b>Principle</b> .....	1
4 <b>Reagents</b> .....	2
5 <b>Apparatus</b> .....	3
6 <b>Sampling and samples</b> .....	4
7 <b>Procedure</b> .....	4
7.1    Preparation of test solution, T <sub>n</sub> .....	4
7.2    Preparation for spectrometric measurements .....	5
7.3    Pre-analysis of the test solution .....	5
7.4    Preparation of calibration solutions for bracketing, K <sub>Ln</sub> and K <sub>Hn</sub> .....	6
7.5    Analysis of test solutions .....	6
8 <b>Expression of results</b> .....	6
8.1    Method of calculation .....	6
8.2    Precision .....	6
9 <b>Test report</b> .....	7
<b>Annex A (normative) Procedure for the determination of instrumental criteria</b> .....	<b>8</b>
<b>Annex B (informative) Suggested lines together with possible spectral interferences in the determination of Nb in steel by ICP-AES</b> .....	<b>10</b>
<b>Annex C (informative) Additional information on the international cooperative tests</b> .....	<b>11</b>
<b>Annex D (informative) Graphical representation of precision data</b> .....	<b>13</b>
