DIN EN 10219-2:2006-07 (E)

Cold formed welded structural hollow sections of non-alloy and fine grain steels - Part 2: Tolerances, dimens ions and sectional properties

Contents

Page

Foreword 3

1 Scope 4

2 Normative references 4

3 Terms and definitions 4

4 Symbols 4

5 Information to be obtained by the manufacturer 5

6 Tolerances 5

7 Measurement of size and shape 8
7.1 General 8
7.2 Outside dimensions 8
7.3 Thickness 8
7.4 Out-of-roundness 9
7.5 Concavity and convexity 9
7.6 Squareness of sides 10
7.7 External corner profile 11
7.8 Twist 11
7.9 Straightness 12

8 Dimensions and sectional properties 12

Annex A (informative) Additional tolerances for piling tube 14

A.1 General 14
A.2 Out of roundness tolerance 14
A.3 Accidental eccentricity tolerance 15
A.4 Dimple tolerance 17

Annex B (normative) Formulae for the calculation of sectional properties 20

B.1 General 20
B.2 Circular hollow sections 20
B.3 Rectangular, or square, hollow sections 21

Annex C (normative) Sectional properties for a limited range of standard sizes 24
