

DIN EN 10315:2006-10 (E)

Routine method for analysis of high alloy steel by X-ray Fluorescence Spectrometry (XRF) by using a near by technique

Contents		Page
Foreword		3
1	Scope	4
2	Normative references	4
3	Principle	5
4	Reagents	5
5	Apparatus	6
6	Safety precautions	7
7	Sampling	7
8	Final sample preparation	7
9	Procedure	7
10	Calibration	8
11	Standardization	9
12	Statistical Process Control (SPC) parameters	9
13	"Near by technique" method	10
14	Test report	10
Annex A (normative) Precision		12
Annex B (normative) Graphical representation of precision data		17
