

DIN EN 14879-4:2008-01 (E)

Organic coating systems and linings for protection of industrial apparatus and plants against corrosion caused by aggressive media - Part 4: Linings on metallic components

Contents	Page
Foreword	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	7
4 General	7
4.1 Materials	7
4.1.1 Metallic substrates and semi-finished products	7
4.1.2 Linings	7
4.2 Selection criteria	9
4.2.1 General	9
4.2.2 Aggressive substances	10
4.2.3 Type and frequency of fluid loading	12
4.2.4 Thermal loading	12
4.2.5 Changes in temperature	12
4.2.6 Mechanical loading	13
4.2.7 Climatic influences	13
4.2.8 Additional requirements	13
4.3 Load profile	13
4.4 Design of component	13
4.5 Manufacture of the lining	13
4.5.1 Environmental conditions	13
4.5.2 Surface condition and preparation of the substrate	14
4.5.3 Preparation and application of pre-cut parts of the semi-finished products	14
4.5.4 Lining joints	15
4.5.5 Thermal post treatment	17
4.6 Lined component	17
5 Repair of defects	17
6 Designations	17
7 Packaging, transport, storage and installation	18
7.1 General	18
7.2 Packaging and transport	18
7.3 Storage	18
7.4 Installation	19
8 External finish of surfaces not to be lined	19
9 Testing	19
9.1 General	19
9.2 Basic requirements	19
9.2.1 Resistance to the service fluid	19
9.2.2 Cleaning and neutralizing processes	19
9.2.3 Adhesive strength	19

9.2.4	Capability of dissipating electrostatic charges	19
9.2.5	Additional requirements	20
9.3	Testing of suitability	20
9.3.1	General	20
9.3.2	Testing of resistance and tightness to the service fluid	21
9.3.3	Testing of adhesive strength	21
9.3.4	Testing of capability to dissipate electrostatic charges	22
9.4	Acceptance inspection	22
9.4.1	General	22
9.4.2	Visual inspection	22
9.4.3	Measurement of lining thickness	23
9.4.4	Testing of Hardness	24
9.4.5	Testing of Adhesion	25
9.4.6	High-voltage testing for tightness	26
9.4.7	Testing of capability to dissipate electrostatic charges (special test)	27
9.4.8	Destructive testing of weld seams (special test)	27
9.4.9	Test report	27
Annex A (informative)		28
Annex B (normative) Material combinations to which the media lists for rubber linings are applicable		29
B.1	Hard rubber linings (media list I)	29
B.2	Soft rubber linings	29
B.2.1	Butyl rubber, halogenated butyl rubber (media list II)	29
B.2.2	Chloroprene rubber (media list III)	29
B.3	Test media for the media lists	29
B.3.1	General	29
B.3.2	Media lists	30
Annex C (normative) Test fluid groups for verification of suitability for material/media combinations		32
Annex D (normative) Testing the dissipating capability		35
D.1	Principle	35
D.1.1	Dissipation resistance	35
D.1.2	Dissipation resistance to earth	35
D.2	Testing of dissipation resistance of test samples	35
D.2.1	Test equipment	35
D.2.2	Test procedure	35
D.2.3	Test report	36
D.3	Measurement of dissipation resistance to earth on the completely applied lining	36
D.3.1	Test equipment	36
D.3.2	Preparation of the lining	36
D.3.3	Procedure	36
D.3.4	Test report	37
Annex E (informative) Sample form for acceptance inspection report		38
Annex F (informative) A-deviations		39
Bibliography		40
