## Colorimetry - Part 2: CIE standard illuminants

---

| <b>Contents</b>  |  | <b>Page</b> |
|--|--|-------------|
| Foreword .....   |  | iv          |
| Introduction .....   |  | v           |
| 1  | Scope .....  | 1           |
| 2  | Normative references .....                             | 1           |
| 3  | Terms and definitions .....                            | 1           |
| 4  | CIE standard illuminant A .....                        | 2           |
| 4.1  | Definition .....                                       | 2           |
| 4.2  | Theoretical basis .....                                | 2           |
| 5  | CIE standard illuminant D65 .....                      | 3           |
| 5.1  | Definition .....                                       | 3           |
| 5.2  | Experimental basis .....                               | 3           |
| 5.3  | Correlated colour temperature .....                    | 3           |
| 6  | CIE standard illuminant D50 .....                      | 3           |
| 6.1  | Definition .....                                       | 3           |
| 6.2  | Correlated colour temperature .....                    | 3           |
| 7  | Sources for realizing CIE standard illuminants .....   | 4           |
| 7.1  | Source for CIE standard illuminant A .....             | 4           |
| 7.2  | Sources for CIE standard illuminants D65 and D50 ..... | 4           |
| Annex A (informative) Table of relative spectral power distribution of CIE standard illuminant A .....           |  | 5           |
| Annex B (normative) Table of relative spectral power distributions of CIE standard illuminants D65 and D50 ..... |  | 18          |
| Annex C (informative) History of the definition of CIE standard illuminant A .....                               |  | 31          |
| Bibliography .....   |  | 32          |
