DIN EN 1777:2010-06 (E)

Hydraulic platforms (HPs) for fire fighting and rescue services - Safety requirements and testing

Contents

Page

Foreword 4

Introduction 6

1 Scope 7

2 Normative references 7

3 Terms and definitions 9

4 List of significant hazards 12

5 Safety requirements and/or protective measures 15
5.1 General 15
5.2 Stability and structural calculations 15
5.2.1 General 15
5.2.2 Loads and forces 16
5.2.3 Determination of loads and forces 16
5.2.4 Stability calculations 19
5.2.5 Structural calculations 24
5.3 Chassis and stabilizers 26
5.4 Extending structure 28
5.4.1 Methods to reduce the risk of overturning and exceeding permissible stresses 28
5.4.2 Operation of the extending structure in a specific sequence to avoid instability 31
5.4.3 Locking of masts at fixed working position 32
5.4.4 Crushing and shearing points between parts of the extending structure, the base and platform 32
5.4.5 Emergency evacuation means for the platform 32
5.4.6 Operator seat 34
5.4.7 Supporting of extending structure in transport position 34
5.5 Extending structure drive systems 34
5.5.1 General 34
5.5.2 Wire rope drive systems 35
5.5.3 Chain drive systems 37
5.6 Platform 38
5.7 Controls 41
5.8 Electrical systems 44
5.9 Pneumatic control systems 45
5.10 Hydraulic drive systems 46
5.11 Hydraulic cylinders 47
5.11.1 Structural design 47
5.11.2 Prevention of unintended movement of the cylinder 52
5.11.3 Verification of requirements on hydraulic cylinders 52
5.12 Static tilt angle 53
5.13 Safety devices 53

6 Verification 56
6.1 Type tests 56
6.1.1 General 56
6.1.2 Static test to verify the stability calculation 56
6.1.3 Residual load test 57

6.1.4 Static overload test ... 57
6.1.5 Ladder type tests ... 57
6.1.6 Dynamic tests ... 58
6.1.7 Tests of vertical load sensing and total moment sensing systems ... 58
6.1.8 Type test on noise ... 59
6.2 Acceptance tests ... 59

7 Information for use ... 59
7.1 Instruction handbook ... 59
7.1.1 General ... 59
7.1.2 Operating instructions ... 59
7.1.3 Transport, handling and storage information ... 60
7.1.4 Information on commissioning ... 61
7.1.5 HP details ... 61
7.1.6 Maximum permitted loads on the platform ... 61
7.1.7 Maintenance information for use by trained personnel ... 61
7.1.8 Special working methods or conditions ... 62
7.1.9 Operating instructions for emergency ... 62
7.1.10 Periodical examinations and tests ... 62
7.2 Marking ... 62
7.3 Safety signs ... 64

Annex A (informative) Special loads and forces -- Use of HP's in wind speeds greater than Beaufort Scale 6 (see 5.2.3.4.1) ... 65

Annex B (informative) Dynamic factors in stability and structural calculations ... 66

Annex C (informative) Major alterations and repairs ... 67

Annex D (normative) Design of wire rope drive systems for the extending structures and platform levelling systems ... 68

D.1 General ... 68
D.2 Calculation of rope drive ... 68
D.3 Calculation of rope diameter (coefficient c) ... 68
D.4 Calculation of the diameters of rope drums, rope pulleys and compensating pulleys [coefficient (h1 × h2)] ... 70
D.5 Efficiency of rope drives ... 73

Annex E (informative) Calculation example of Annex D for wire rope, drum and pulley diameters ... 75

E.1 Notes ... 75
E.2 Annex D method summarised ... 75
E.3 Example ... 76
E.3.1 General ... 76
E.3.2 Drive group -- See D.2 and Table D.1 ... 76
E.3.3 Calculation of minimum rope diameter -- See D.3 ... 76
E.3.4 Calculation of the diameters of rope drums, pulleys and static pulleys -- See D.4 ... 77

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC ... 80

Bibliography ... 81
