

DIN EN 1777:2010-06 (E)

Hydraulic platforms (HPs) for fire fighting and rescue services - Safety requirements and testing

Contents		Page
Foreword		4
Introduction		6
1	Scope	7
2	Normative references	7
3	Terms and definitions	9
4	List of significant hazards	12
5	Safety requirements and/or protective measures	15
5.1	General	15
5.2	Stability and structural calculations	15
5.2.1	General	15
5.2.2	Loads and forces	16
5.2.3	Determination of loads and forces	16
5.2.4	Stability calculations	19
5.2.5	Structural calculations	24
5.3	Chassis and stabilizers	26
5.4	Extending structure	28
5.4.1	Methods to reduce the risk of overturning and exceeding permissible stresses	28
5.4.2	Operation of the extending structure in a specific sequence to avoid instability	31
5.4.3	Locking of masts at fixed working position	32
5.4.4	Crushing and shearing points between parts of the extending structure, the base and platform	32
5.4.5	Emergency evacuation means for the platform	32
5.4.6	Operator seat	34
5.4.7	Supporting of extending structure in transport position	34
5.5	Extending structure drive systems	34
5.5.1	General	34
5.5.2	Wire rope drive systems	35
5.5.3	Chain drive systems	37
5.6	Platform	38
5.7	Controls	41
5.8	Electrical systems	44
5.9	Pneumatic control systems	45
5.10	Hydraulic drive systems	46
5.11	Hydraulic cylinders	47
5.11.1	Structural design	47
5.11.2	Prevention of unintended movement of the cylinder	52
5.11.3	Verification of requirements on hydraulic cylinders	52
5.12	Static tilt angle	53
5.13	Safety devices	53
6	Verification	56
6.1	Type tests	56
6.1.1	General	56
6.1.2	Static test to verify the stability calculation	56
6.1.3	Residual load test	57

6.1.4	Static overload test	57
6.1.5	Ladder type tests	57
6.1.6	Dynamic tests	58
6.1.7	Tests of vertical load sensing and total moment sensing systems	58
6.1.8	Type test on noise	59
6.2	Acceptance tests	59
7	Information for use	59
7.1	Instruction handbook	59
7.1.1	General	59
7.1.2	Operating instructions	59
7.1.3	Transport, handling and storage information	60
7.1.4	Information on commissioning	61
7.1.5	HP details	61
7.1.6	Maximum permitted loads on the platform	61
7.1.7	Maintenance information for use by trained personnel	61
7.1.8	Special working methods or conditions	62
7.1.9	Operating instructions for emergency	62
7.1.10	Periodical examinations and tests	62
7.2	Marking	62
7.3	Safety signs	64
Annex A (informative) Special loads and forces -- Use of HP's in wind speeds greater than Beaufort Scale 6 (see 5.2.3.4.1)		65
Annex B (informative) Dynamic factors in stability and structural calculations		66
Annex C (informative) Major alterations and repairs		67
Annex D (normative) Design of wire rope drive systems for the extending structures and platform levelling systems		68
D.1	General	68
D.2	Calculation of rope drive	68
D.3	Calculation of rope diameter (coefficient c)	68
D.4	Calculation of the diameters of rope drums, rope pulleys and compensating pulleys [coefficient (h1 × h2)]	70
D.5	Efficiency of rope drives	73
Annex E (informative) Calculation example of Annex D for wire rope, drum and pulley diameters ...		75
E.1	Notes	75
E.2	Annex D method summarised	75
E.3	Example	76
E.3.1	General	76
E.3.2	Drive group -- See D.2 and Table D.1	76
E.3.3	Calculation of minimum rope diameter -- See D.3	76
E.3.4	Calculation of the diameters of rope drums, pulleys and static pulleys -- See D.4	77
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC		80
Bibliography		81
