DIN EN 1947:2014-09 (E)

Fire-fighting hoses - Semi-rigid delivery hoses and hose assemblies for pumps and vehicles

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Classification 6
4.1 General 6
4.2 Classification by types (hose construction) 6
4.3 Classification by class (materials for lining and cover) 7
4.4 Classification by category 7

5 Dimensions, tolerances and maximum mass 7
5.1 Inside diameter and maximum mass 7
5.2 Length and tolerances on length 8
5.3 Concentricity 8

6 Performance requirements of finished hose 8
6.1 Hydrostatic requirements 8
6.1.1 Deformation under maximum working pressure 8
6.1.2 Deformation under proof pressure 8
6.1.3 Minimum burst pressure 9
6.1.4 Kink pressure 9
6.2 Adhesion 9
6.3 Accelerated ageing 9
6.4 Abrasion resistance 9
6.4.1 Abrasion resistance of class 5 and class 6 hoses 9
6.4.2 Abrasion resistance of classes 1, 2, 3 and 4 hoses 10
6.5 Low temperature flexibility 10
6.6 Hot surface resistance 10
6.7 Ozone resistance 10
6.8 Bending and crush resistance 10
6.9 UV-resistance (xenon arc lamp) 10
6.10 Loss in mass on heating 10
6.11 Deformation under crushing (type C only) 10

7 Frequency of testing 11

8 Marking 11

9 Hose assemblies 12

Annex A (normative) Test for hose assemblies 13

A.1 Test piece 13
A.2 Procedure 13

Annex B (normative) Frequencies of testing (type test and production test) 14

Annex C (informative) Frequencies of testing (batch test) 15

Bibliography 16
