Foreword v

Introduction vi

1 Scope 1

2 Termsanddefinitions 1

3 Components 4
3.1 General 4
3.2 Detectors 4
3.3 Discharge nozzles 5
3.4 Operating devices 5
3.5 Manual actuators 5
3.6 Shut-off devices 5
3.7 Pipe, fittings, tubing and hose 6
3.8 Extinguishing agent 6
3.9 Indicators 6

4 System requirements 6
4.1 General 6
4.2 Use 6
4.3 Applications 6
4.4 System actuation 7
4.5 Supervision 8
4.6 System location 8
4.7 Discharge nozzles 8
4.8 Special requirements 8
4.9 Protection of common exhaust duct 9

5 Test methods 9
5.1 Cooking appliance extinguishing tests 9
5.1.1 General 9
5.1.2 Deep fat fryer 10
5.1.3 Griddle 11
5.1.4 Range top 12
5.1.5 Gas radiant char-broiler 12
5.1.6 Electric char-broiler 13
5.1.7 Lava, pumice or synthetic rock char-broiler 13
5.1.8 Natural charcoal broiler 13
5.1.9 Mesquite wood char-broiler 14
5.1.10 Upright broiler 14
5.1.11 Chain broiler 14
5.1.12 Wok 15
5.2 Splash tests 15
5.2.1 Deep fat fryer extinguishing splash tests 15
5.2.2 Deep fat fryer cooking temperature splash test 16
5.2.3 Range top extinguishing splash tests 17
5.2.4 Range top cooking temperature splash tests 17
5.2.5 Wok extinguishing splash test 18
5.2.6 Wok cooking temperature splash tests 18

5.3 Hood and duct (full scale) extinguishing test 19
5.3.1 General 19
5.3.2 Hood 19
5.3.3 Filter and frame 19
5.3.4 Duct 20
5.4 Extinguishing system unit test 21
5.4.1 Preparation 21

5.4.2 General test procedures 22
5.4.3 Fuel ignition and extinguishing system unit operation 23
5.4.4 Plenum testing 23
5.4.5 Conditions of acceptability 23

6 Installation, operation and maintenance instruction manual 23

7 Owner's manual 25

8 Test report 26
