Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principles for building urban resilience 5

5 Characteristics of urban resilience 6

6 Framework for urban resilience 7
6.1 General 7
6.2 Urban System Model 9
6.3 Data -- Urban Context and Urban Performance 10
6.3.1 General 10
6.3.2 Urban Context 10
6.3.3 Urban Performance 10
6.3.4 Elements of an urban system 11
6.4 Analytical lenses 12
6.4.1 General 12
6.4.2 Key analytical functions of the Who lens -- Local government and stakeholders (LGS) 13
6.4.3 Key analytical functions of the Why lens -- Shocks, stresses and challenges (SSC) 14
6.4.4 Key analytical functions of the How lens -- Policies, plans and initiatives (PPI).15 7 Actions for Resilience (A4R) 15

8 Assessment of relevant International Standards and frameworks 16
8.1 General 16
8.2 Identified gaps 16

9 Conclusion and suggestion for future standardization work 17

Annex A (informative) Data -- Urban Context 19

Annex B (informative) Data -- Urban Performance 20

Annex C (informative) The Who lens -- Local government and stakeholders (LGS) 21

Annex D (informative) The Why lens -- Shocks, stresses and challenges (SSC) 22

Annex E (informative) Plausible types and sub-types of shocks affecting urban resilience 23

Annex F (informative) The How lens -- Policies, plans and initiatives (PPI) 25

Annex G (informative) Key and cross-cutting issues providing additional layers of informationonspecifictopics 26
