DIN EN 15004-1:2025-03 (E)

Fixed firefighting systems - Gas extinguishing systems - Part 1: Design, installation and maintenance (ISO 14520-1:2023, modified)

Contents

Page

European foreword ... 9

Introduction ... 11

1 Scope ... 12

2 Normative references ... 13

3 Terms and definitions ... 13

4 Use and limitations ... 17
4.1 General ... 17
4.2 Extinguishants ... 18
4.2.1 General ... 18
4.2.2 Environmental properties ... 18
4.3 Electrostatic discharge ... 18
4.4 Compatibility with other extinguishants ... 18
4.5 Temperature limitations ... 19

5 Safety ... 19
5.1 Hazard to personnel ... 19
5.2 Safety precautions ... 20
5.2.1 General ... 20
5.2.2 For normally occupied areas ... 20
5.2.3 For normally unoccupied areas ... 22
5.2.4 For unoccupiable areas ... 22
5.3 Occupiable areas ... 22
5.4 Electrical hazards ... 23
5.5 Electrical earthing ... 24
5.6 Electrostatic discharge ... 24

6 System design ... 24
6.1 General ... 24
6.2 Extinguishant supply ... 24
6.2.1 Quantity ... 24
6.2.2 Quality ... 25
6.2.3 Container arrangement ... 25
6.2.4 Storage containers ... 25
6.3 Distribution ... 26
6.3.1 General ... 26
6.3.2 Piping ... 27
6.3.3 Fittings ... 28
6.3.4 Pipe and valve supports ... 28
6.3.5 Valves ... 29
6.3.6 Nozzles ... 29
6.3.7 Pressure reducing orifice assembly ... 30
6.4 Detection, actuation and control systems ... 30
6.4.1 General ... 30
6.4.2 Automatic detection ... 30
6.4.3 Operating devices ... 31
6.4.4 Control equipment ... 31

6.4.5 Operating alarms and indicators 32
6.4.6 Stop / hold off devices 32

7 Extinguishant system design 32
7.1 General 32
7.2 Specifications, plans and approvals 33
7.2.1 Specifications 33
7.2.2 Working documents 33
7.3 System flow calculations 33
7.3.1 General 33
7.3.2 Balanced and unbalanced system 33
7.3.3 Friction losses 35
7.3.4 Pressure drop 35
7.3.5 Elevation change 36
7.3.6 Valves and fittings 36
7.3.7 Piping length 36
7.3.8 Drawings 36
7.3.9 Liquefied gases — Specific requirements 36
7.4 Enclosures 36
7.5 Effects of noise 37
7.6 Extinguishant concentration requirements 37
7.6.1 Flame extinguishment 37
7.6.2 Inerting 39
7.7 Total flooding quantity 39
7.7.1 General 39
7.7.2 Liquefied gases 39
7.7.3 Non-liquefied gas 39
7.8 Altitude adjustment 40
7.9 Duration of protection 41
7.10 System performance 41
7.10.1 Discharge time 41
7.10.2 Extended discharge 41

8 Commissioning and acceptance 42
8.1 General 42
8.2 Tests 42
8.2.1 General 42
8.2.2 Enclosure check 42
8.2.3 Review of mechanical components 42
8.2.4 Review of enclosure integrity 43
8.2.5 Review of electrical components 43
8.2.6 Preliminary functional tests 45
8.2.7 System functional operational test 45
8.2.8 Remote monitoring operations (if applicable) 45
8.2.9 Control panel primary power source 46
8.2.10 Completion of functional tests 46
8.3 Completion certificate and documentation 46

9 Inspection, maintenance, testing and training 46
9.1 General 46
9.2 Inspection 46
9.2.1 General 46
9.2.2 Container 47
9.2.3 Hose 47
9.2.4 Enclosures 47

9.3 Maintenance **47**
9.3.1 General **47**
9.3.2 User's programme of inspection **47**
9.3.3 Service schedule **48**
9.4 Training **48**
Annex A (normative) **Working documents** **49**
A.1 General **49**
A.2 Working documents **49**
A.3 Specific details **50**
A.3.1 Pre-engineered systems **50**
A.3.2 Engineered systems **50**
Annex B (normative) **Determination of flame-extinguishing concentration of gaseous extinguishants by the cup burner method** **51**
B.1 General **51**
B.2 Principle **51**
B.3 Requirements for apparatus **51**
B.3.1 General **51**
B.3.2 Cup **52**
B.3.3 Chimney **52**
B.3.4 Diffuser **52**
B.3.5 Fuel supply **53**
B.3.6 Manifold **53**
B.3.7 Air supply **53**
B.3.8 Extinguishant supply **53**
B.3.9 Delivery system **53**
B.4 Requirements for materials **53**
B.4.1 Air **53**
B.4.2 Fuel **53**
B.4.3 Extinguishant **53**
B.5 Procedure for flammable liquids **53**
B.6 Procedure for flammable gases **54**
B.7 Extinguishant extinguishing concentration **55**
B.7.1 Preferred method **55**
B.7.2 Alternative method **55**
B.8 Reporting of results **56**
Annex C (normative) **Fire extinguishment/area coverage fire test procedure for engineered and pre-engineered extinguishing units** **58**
C.1 Requirements **58**

C.2 Type of test and report of test results 58
C.2.1 Type of test 58
C.2.2 Reporting of test results 59
C.3 Extinguishing system 61
C.4 Extinguishing concentration 62
C.4.1 Extinguishing agent concentration 62
C.4.2 Cold discharge test 63
C.5 Nozzle distribution verification tests 64
C.5.1 Nozzle minimum height/maximum area coverage test 64
C.5.1.1 Test facility 64
C.5.1.2 Fuel specification 69
C.5.1.3 Test procedure 70
C.5.1.4 Determination of distribution performance of the nozzle 71
C.5.1.5 Reporting of test results 71
C.5.2 Nozzle maximum height test 71
C.5.2.1 Test facility 71
C.5.2.2 Fuel specification 72
C.5.2.3 Test procedure 72
C.5.2.4 Determination of distribution performance of the nozzle 72
C.5.2.5 Reporting of test results 72
C.6 Extinguishing concentration tests 73
C.6.1 Wood crib test 73
C.6.1.1 Test facility 73
C.6.1.2 Fuel specification 76
C.6.1.3 Test procedure 78
C.6.1.4 Determination of design extinguishant concentration 79
C.6.1.5 Reporting of test results 79
C.6.2 Heptane pan test 80
C.6.2.1 Test facility 80
C.6.2.2 Fuel specification 80
C.6.2.3 Test procedure 80
C.6.2.4 Determination of design extinguishant concentration 80
C.6.2.5 Reporting of test results 81
C.6.3 Polymeric sheet fire test 81
C.6.3.1 Test facility 81
C.6.3.2 Fuel specification 81

C.6.3.3 Test procedure **85**
C.6.3.4 Determination of design extinguishant concentration **87**
C.6.3.5 Reporting of test results **87**
Annex D (normative) **Method of evaluating inerting concentration of a fire extinguishant** **88**
D.1 General **88**
D.2 Principle **88**
D.3 Apparatus **88**
D.4 Procedure **88**
D.5 Inerting concentration **89**
Annex E (normative) **Door fan test for determining of minimum hold time** **90**
E.1 General **90**
E.2 Test for determination of predicted hold time **90**
E.2.1 Principle **90**
E.2.2 Apparatus **91**
E.2.3 Calibration and accuracy of apparatus **91**
E.2.3.1 Fan unit **91**
E.2.3.2 Pressure measuring devices **91**
E.2.3.3 Temperature measuring devices **91**
E.2.4 Preliminary preparation **91**
E.2.5 Evaluation of enclosure **92**
E.2.5.1 General **92**
E.2.5.2 Mixing during hold time **92**
E.2.6 Measurement of enclosure **92**
E.2.6.1 Standard enclosures without continuous mixing **92**
E.2.6.2 Non-standard enclosures without continuous mixing **93**
E.2.6.3 Enclosures of any shape with continuous mixing **93**
E.2.6.4 Opening for mounting the fan unit **93**
E.2.7 Test procedure **93**
E.2.7.1 Preparation **93**
E.2.7.2 Setting up the door fan unit **94**
E.2.7.3 Measurement of bias pressure during fan testing (P_{bt}) **94**
E.2.7.4 Measurement of leakage rate **95**
E.2.7.5 Field calibration check **95**
E.2.7.6 Measurement of bias pressure under hold time conditions (P_{bh}) **96**
E.2.8 Calculation **97**
E.2.8.1 Selection of appropriate hold time equation **97**

E.2.8.2 Symbols **97**
E.2.8.3 Depressurisation and pressurisation leakage characteristics **99**
E.2.8.4 Column pressures **100**
E.2.8.5 Average leakage characteristics **102**
E.2.8.6 Correlation and simplifying constants **102**
E.2.8.7 Predicted hold time: standard enclosures without continuous mixing **103**
E.2.8.8 Predicted hold time: enclosures of any shape with continuous mixing **104**
E.2.8.9 Predicted hold time for non-standard enclosures without continuous mixing **104**
E.3 Treatment of enclosures with predicted hold times less than the recommended value **105**
E.3.1 General **105**
E.3.2 Leakage areas **105**
E.3.3 Improved sealing of the enclosure **106**
E.3.4 Quantification and location of leaks **106**
E.3.4.1 General **106**
E.3.4.2 Second calculation of hold time **106**
E.3.4.3 Method of estimating *F* **106**
E.3.4.4 Final calculation of hold time **107**
E.4 Report **107**
Annex F (informative) **System performance verification** **109**
Annex G (informative) **Safe personnel exposure guidelines** **110**
G.1 General **110**
G.2 Safety **110**
G.3 Hazards to personnel — Potential hazards **110**
G.3.1 Agent itself **110**
G.3.2 Noise **110**
G.3.3 Turbulence **110**
G.3.4 Low temperature **110**
G.4 Halocarbon agents **111**
G.4.1 Toxicity of halocarbons (liquefied gases) **111**
G.4.2 PBPK model **112**
G.4.3 Safe exposure guidelines for halocarbons **113**
G.4.3.1 Any unnecessary exposure to halocarbon clean agents, even at NOAEL concentrations, and to halocarbon decomposition products shall be avoided. The requirements for pre-discharge alarms and time delays are intended to prevent human exposure to agents **113**
G.4.4 Effects of impurities on safe use **115**
G.5 Inert gas (non-liquefied gas) **116**

G.5.1 Physiological effects of inert gas agents **116**
G.5.2 Safe exposure guidelines for inert gas agents **116**
Annex H (informative) **Flow calculation implementation method and flow calculation verification and testing for approvals** **118**
H.1 General **118**
H.2 Calculation method implementation **118**
H.3 Minimum accuracy recommendations **119**
H.4 Recommended testing procedure for system flow calculation method (software) validation **119**
H.4.1 General **119**
H.4.1.1 Method 1 ..... **119**
H.4.1.2 Method 2 — Modular validation process for calculation software **120**
H.4.2 System design for testing **120**
H.5 Pass/fail criteria **121**
Annex I (informative) **Scaling factors for Class B fuels other than heptane** **122**
I.1 Scope **122**
I.2 Requirements in accordance with Annex C **122**
I.3 Proposed scaling factor method **122**
I.4 Procedure **122**
Annex J (normative) **Criteria for assessment of new extinguishants for inclusion in the EN 15004 series** **123**
J.1 Scope **123**
J.2 Checklist **123**
Bibliography **126**
