ISO 22372:2025-11 (E)

Security and resilience - Community resilience - Guidelines for infrastructure resilience

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Framework **3**
4.1 General 3
4.2 Objectives and responsibilities 3
4.3 Identifying and assessing capabilities of infrastructure 3
4.4 Setting priorities 5
4.5 Establishing a strategy and plan 6

5 Principles **7**
5.1 General 7
5.2 Principle 1: Clearly defined accountabilities and shared responsibilities 8
5.3 Principle 2: Proactively protected 9
5.4 Principle 3: Environmentally integrated 10
5.5 Principle 4: Socially engaged 11
5.6 Principle 5: Adaptively transforming 12
5.7 Principle 6: Continually learning and improving 13

6 Operational processes **13**
6.1 General 13
6.2 Plan: developing and sharing understanding 14
6.2.1 General 14
6.2.2 Collecting evidence 14
6.2.3 Working with and sharing information with others 15
6.3 Plan: investing in infrastructure resilience 18
6.3.1 General 18
6.3.2 P1A6 Share hazard, risk and return information 18
6.3.3 P1A7 Invest to enhance resilience 18
6.3.4 P2A12 Devise long-term investments 19
6.4 Do: devising and designing ways to improve infrastructure resilience 19
6.4.1 General 19
6.4.2 P2A1 Increase essential safety requirements 20
6.4.3 P2A2 Exceed basic requirements for critical components 20
6.4.4 P2A3 Consider interdependencies of systems and systemic risks 21
6.4.5 P2A8 Design infrastructure to fail safely 21
6.4.6 P2A10 Design for multiple scales 21
6.4.7 P3A2 Appropriate use of nature-based solutions 21
6.4.8 P3A5 Use environmentally sustainable resources 21
6.4.9 P3A6 Sustainable use of natural resources 22
6.5 Do: implementing ways to improve infrastructure resilience 22
6.5.1 General 22
6.5.2 P2A4 Secure multiple resilience pathways and controls 23
6.5.3 P2A5 Take timely action 23
6.5.4 P2A6 Embed emergency management 23
6.5.5 P2A7 Consider infrastructure users 23

6.5.6 P2A9 Implement strategies to overcome systemic weaknesses found by stress testing 24
6.5.7 P3A1 Minimize environmental exposure and impact 24
6.5.8 P4A4 Focus resources on critical tasks during emergencies 24
6.5.9 P5A2 Create and enhance adaptive capacity 24
6.5.10 P6A7 Establish redundancy within any monitoring and analysis system 24
6.6 Check: testing ways to improve resilience 25
6.6.1 General 25
6.6.2 P6A4 Analyse, learn, and formulate improvements 25
6.6.3 P6A5 Develop and test strategies to overcome component vulnerabilities 25
6.7 Check: monitoring infrastructure resilience 26
6.7.1 General 26
6.7.2 P1A8 Manage infrastructure resilience performance 26
6.7.3 P6A3 Monitor and report 26
6.8 Act: improving practices, norms and management approaches 26
6.8.1 General 26
6.8.2 P4A1 Encourage active public participation 27
6.8.3 P4A3 Assess needs and expectations of the public 27
6.8.4 P4A5 Prepare people for disruptive incidents 28
6.8.5 P5A1 Choose manageable solutions 28
6.8.6 P5A3 Develop flexible management 28
6.8.7 P5A4 Enable capacity to extend beyond initial scope 28
6.8.8 P5A5 Allow for human discretion 29
6.8.9 P6A6 Maintain and improve competencies 29
6.9 Act: maintaining operational infrastructure and its natural environment 29
6.9.1 General 29
6.9.2 P2A11 Adopt condition-based maintenance 30
6.9.3 P2A13 Inspect assets after disruptive incidents and near misses 30
6.9.4 P3A4 Maintain the natural environment 30
Annex A (informative) **Example of a governance framework for infrastructure resilience** **31**
Bibliography **33**
