DIN EN 1866-1:2007-10 (E)

Mobile fire extinguishers - Part 1: Characteristics, performance and test methods

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Symbols and abbreviations 7

5 Description of an extinguisher 7
5.1 Type of extinguisher 7
5.2 Components of extinguisher 8

6 Requirements 8
6.1 Effective range of operating temperatures 8
6.1.1 General 8
6.1.2 Requirements 8
6.1.3 Additional Requirements for CO2 extinguishers 9
6.2 Filling specifications 9
6.2.1 Nominal charges 9
6.2.2 Filling tolerances 9
6.2.3 Propelling agent 9
6.3 Duration of operation, residual mass and discharge range 10
6.3.1 Duration of operation 10
6.3.2 Maximum residual mass 11
6.4 Retention of propellant 11
6.4.1 General 11
6.4.2 Propellant container 11
6.4.3 Stored pressure extinguishers 11
6.4.4 Acceptance levels 11
6.5 Control valve 12
6.6 Working position 12
6.7 Hose and coupling 12
6.8 Operation devices 12
6.8.1 General 12
6.8.2 Operating and jet control mechanisms devices 12
6.8.3 Safety devices 13
6.8.4 Discharge from water based extinguishers 13
6.8.5 Pressure gauge 13
6.8.6 Other characteristics 15
6.9 Identification 16
6.9.1 Colour 16
6.9.2 Marking 16
6.10 Periodical checking 19

7 Tests 19
7.1 Temperature test 19
7.2 Corrosion tests 19
7.2.1 External corrosion test 19
7.2.2 Internal corrosion test for water based extinguishers 20
7.3 Dielectric test 20

8 Fire performances 20
8.1 Class A fire test object 20
8.1.1 General 20
8.1.2 Powder extinguishers 20
8.1.3 Water based extinguishers 20
8.2 Class B fire test object 20
8.2.1 General 20
8.2.2 Powder extinguishers 21
8.2.3 Water based extinguishers 21
8.2.4 CO2 extinguishers 22

Annex A (normative) Test methods 23

A.1 Test methods 23
A.2 Duration of operation and residual mass 23
A.3 Measurement of the force 23
A.4 Measurement of the energy 23
A.5 Measurement of leakage of the control valve 23
A.6 Temperatures test 24
A.7 Internal corrosion test 24
