DIN EN 15821:2011-01 (E)

Multi-firing sauna stoves fired by natural wood logs - Requirements and test methods

Contents

Page

Foreword 4
Introduction 5
1 Scope 5
2 Normative references 6
3 Terms and definitions 6
4 Crashworthiness design categories of railway vehicles 8
5 Design collision scenarios 9
6 Structural passive safety 11
6.1 General principles 11
6.2 Overriding 12
6.2.1 Requirements 12
6.2.2 Explanatory notes (informative) 12
6.3 Survival space, intrusion and egress 13
6.3.1 Requirements 13
6.3.2 Explanatory notes (informative) 14
6.4 Deceleration limit/collision pulse 14
6.4.1 Requirement 14
6.4.2 Explanatory notes (informative) 15
6.5 Obstacle deflector 15
6.5.1 Requirement 15
6.5.2 Explanatory notes (informative) 16
7 Validation of crashworthiness 17
Annex A (informative) Parameters of design collision scenarios 19
A.1 Introduction 19
A.2 Determining the design collision scenarios for collision risks which differ from the normal European operations 20
A.2.1 Design collision scenarios 20
A.2.2 Risk analysis 20
A.2.3 Factors to be considered in the risk assessment 21
A.2.4 Collisions following derailment 21
A.2.5 Bibliography of relevant accident information 22
Annex B (normative) Requirements of a validation programme 23
B.1 Test specifications 23
B.1.1 Test programme 23
B.1.2 Acceptance criteria for calibration/validation tests 23
B.2 Numerical simulations 24
B.2.1 Numerical model validation 24
B.2.2 Simulation modelling 24
Annex C (normative) Reference obstacle definitions 26
C.1 80 t wagon 26
C.2 C-III Reference obstacle 27
C.3 Large deformable obstacle 29
C.4 C-IV Corner collision obstacle 31

Annex D (normative) **Reference train definitions – Defined formations** **32**
D.1 Reference trains for locomotive, power head, driving trailer and coach design **32**
D.2 Locomotive design **32**
D.3 Power head and driving trailer design **32**
D.4 Individual coach design **33**

Annex E (informative) **Migration rule for this European Standard** **35**

Annex ZA (informative) **〈A1〉 Relationship between this European Standard and the Essential Requirements of EU Directive 2008/57/EC of the European Parliament and of the Council of 17 June 2008 on the interoperability of the rail system within the Community (Recast) 〈A1|** **36**

Bibliography **39**

Figures

Figure 1 — Example for clearance requirement of crumple zones in areas of temporary occupation (e.g. vestibule) **13**
Figure 2 — Driver's seat clearance zone **14**
Figure 3 — Obstacle deflector load application **16**
Figure C.1 — Buffered wagon interface **26**
Figure C.2 — Wagon buffer characteristic **27**
Figure C.3 — Peri-urban tram obstacle **28**
Figure C.4 — Coupler characteristic **28**
Figure C.5 — Deformable obstacle geometry **30**
Figure C.6 — Deformable obstacle stiffness **30**
Figure C.7 — Tram corner collision obstacle **31**
Figure D.1 — Locomotive reference train **32**
Figure D.2 — Power head/driving trailer reference train **33**
Figure D.3 — Coach simplified assessment **34**
