Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Principle 6

4 Apparatus 6

5 Test specimens 6
5.1 General 6
5.2 Square-shaped test specimens for homogeneous plastics 7
5.3 Test specimens of reinforced plastics affected by anisotropic diffusion effects 7
5.4 Tubular test specimens 7
5.5 Rod-shaped test specimens 8
5.6 Specimens cut from finished products, extrusion compounds, sheets or laminates 8

6 Test conditions and procedures 8
6.1 General 8
6.2 General conditions 8
6.3 Method 1: Determination of amount of water absorbed after immersion in water at 23 °C 9
6.4 Method 2: Determination of amount of water absorbed after immersion in boiling water 9
6.5 Method 3: Determination of water-soluble matter lost during immersion 10
6.6 Method 4: Determination of amount of water absorbed after exposure to 50 % relative humidity 10

7 Expression of results 10
7.1 Percentage by mass of water absorbed 10
7.2 Determination of the water content at saturation and the water diffusion coefficient using Fick's laws 11

8 Precision 12

9 Test report 13

Annex A (informative) Correlation between water absorption by test specimens and Fick's diffusion laws 14

Annex B (informative) Precision statement 16
