ISO 10928:2009-09 (E)

Plastics piping systems - Glass-reinforced thermosetting plastics (GRP) pipes and fittings - Methods for regression ana lysis and their use

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Principle 1

3 Procedures for determining the linear relationships - Methods A and B 1
3.1 Procedures common to methods A and B 1
3.2 Method A - Covariance method 2
3.3 Method B - Regression with time as the independent variable 8

4 Application of methods to product design and testing 11
4.1 General 11
4.2 Product design 12
4.3 Comparison to a specified value 12
4.4 Declaration of a long-term value 12

Annex A (normative) GRP pressure pipe design procedure 13

Annex B (informative) Second-order polynomial relationships 20

Annex C (informative) Non-linear relationships 25

Annex D (informative) Calculation of lower confidence and prediction limits for method A 49
