

DIN 16961-1:2011-01 (E)

Thermoplastics pipes and fittings with profiled wall and smooth pipe inside - Part 1: Dimensions

| Contents | Page |
|--|-----------|
| Foreword | 3 |
| 1 Scope | 4 |
| 2 Normative references | 4 |
| 3 Terms and definitions | 4 |
| 4 Classification of pipe stiffness | 5 |
| 4.1 General | 5 |
| 4.2 Profiled pipe series (RR) based on ring stiffness SR24 | 5 |
| 4.3 Ring stiffness classes SN | 5 |
| 5 Dimensions and designations | 6 |
| 5.1 General | 6 |
| 5.2 Pipes | 6 |
| 5.3 Fittings | 10 |
| 6 Joints | 16 |
| Bibliography | 17 |
| Figures | |
| Figure 1 -- Examples of possible types of profiled pipes | 7 |
| Figure 2 -- Gusseted bend | 11 |
| Figure 3 -- 45° branch | 13 |
| Figure 4 -- Transition pipe | 15 |
| Figure 5 -- Examples of possible joints | 16 |
| Tables | |
| Table 1 -- Ring stiffness | 5 |
| Table 2 -- Ring stiffness classes SN | 6 |
| Table 3 -- Code system for the designation of pipe ends | 6 |
| Table 4 -- Tolerances on pipe inside diameter for ID pipes | 8 |
| Table 5 -- Tolerances on pipe outside diameter for OD pipes | 9 |
| Table 6 -- Limit deviations for pipe lengths | 10 |
| Table 7 -- Dimensions for gusseted bends | 12 |
| Table 8 -- Dimensions for 45° branches | 14 |
| Table 9 -- Dimensions for transition pipes | 15 |
