DIN EN ISO 25762:2012-04 (E)

Plastics - Guidance on the assessment of the fire characteristics and fire performance of fibre-reinforced polymer composites (ISO 25762:2009)

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms, definitions and abbreviated terms 6
3.1 General 6
3.2 Types of material 7

4 Fibre reinforcement 8
4.1 Form 8
4.2 Fibre content 8
4.3 Core materials 8
4.4 Production methods 8

5 Fire characteristics 9
5.1 Reaction to fire 9
5.1.1 General 9
5.1.2 Combustibility 9
5.1.3 Ignitability 9
5.1.4 Rate of heat release 9
5.1.5 Flame spread 9
5.1.6 Smoke 10
5.1.7 Toxicity 10
5.2 Structural performance 10
5.2.1 General 10
5.2.2 Walls and ceilings 11
5.2.3 Floors 11
5.2.4 Structural integrity of fibre-reinforced composites on exposure to fire 11

6 Fire test methods 12
6.1 Assessment of fire hazard 12
6.2 Fire tests for determining performance requirements 12
6.3 Applicability of standard fire test methods to FRP composites 12
6.4 Large-scale tests 13
6.5 Standard fire tests for conformity purposes 13

Annex A (informative) Heat release measurements on FRP composites 14

Annex B (informative) Typical results given for glass-fibre-reinforced polymer composites by ISO and EN fire test methods 16

Annex C (informative) Recommendations for the handling and storage of fibre-reinforced polymer composites 24

Annex D (informative) Procedure in the event of fire involving fibre-reinforced polymer composites 26

Annex E (informative) Mounting and fixing of test specimens of fibre-reinforced polymer composites 27
