Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 6

4 Principle 7

5 Test environment 8

6 Materials 8

7 Apparatus 8

8 Procedure 8
8.1 Preparation of the test material 8
8.2 Preparation of the reference material 9
8.3 Preparation of the test soil 9
8.4 Start-up and execution of the test 11

9 Calculation and expression of results 13
9.1 Calculation 13
9.2 Expression and interpretation of results 14

10 Validity of results 14

11 Test report 14

Annex A (informative) Principle of a manometric respirometer (example) 16

Annex B (informative) Example of a system for measuring the amount of carbon dioxide evolved 17

Annex C (informative) Examples of methods for the determination of evolved carbon dioxide 18

Annex D (informative) Theoretical oxygen demand (ThOD) 20

Annex E (informative) Example of a determination of the amount and the molecular mass of water-insoluble polymer remaining at the end of a biodegradation test 21

Annex F (informative) Examples of long-term tests 22

Annex G (informative) Round-robin testing 26
