Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Principle 2

5 Apparatus 3
5.1 Loading apparatus 3
5.2 Ring deflection measuring device 3
5.3 Temperature chamber 4
5.4 Test medium 4
5.5 Timing device 4
5.6 Microscope 4
5.7 Notching apparatus 5

6 Test specimen 7
6.1 Specimen geometry and dimensions 7
6.2 Specimen preparation 7
6.3 Specimen conditioning 9

7 Procedure 9
7.1 Conditioning 9
7.2 Load application 9
7.3 On-set slow cracking time detection 10
7.4 Notch depth measurement 10
7.5 Number of specimens 10

8 Test report 10

Annex A (informative) On-set slow cracking time detection 12

Annex B (informative) Stress intensity factor plot 16

Annex C (informative) Flexure load estimation 20
