ISO 15114:2014-05 (E)

Fibre-reinforced plastic compos ites - Determination of the mode II fracture resistance for unidirectionally reinforced materials using the calibrated end-loaded split (C-ELS) test and an effective crack length approach

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Symbols and abbreviated terms 1

4 Principle 2

5 Apparatus 2

6 Specimens 4
6.1 Preparation of specimens 4
6.2 The initial defect 4
6.3 Attaching the load-block to the specimen 4
6.4 Moisture conditioning 5
6.5 Final specimen preparation and measuring dimensions 5
6.6 Number of specimens 6

7 Procedure 6
7.1 Performing the calibration of the ELS fixture 6
7.2 Pre-cracking the specimens 7
7.3 Testing the samples in mode II from the precrack formed in 7.2 8

8 Data analysis 8
8.1 The points for data analysis 8
8.2 Determination of the ELS clamp correction 10
8.3 Determination of GIIC values 11

9 Precision 13

10 Test report 14

Annex A (informative) Large displacement and load-block correction factors 16

Bibliography 18
