

ISO 15114:2014-05 (E)

Fibre-reinforced plastic composites - Determination of the mode II fracture resistance for unidirectionally reinforced materials using the calibrated end-loaded split (C-ELS) test and an effective crack length approach

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Symbols and abbreviated terms	1
4	Principle	2
5	Apparatus	2
6	Specimens	4
6.1	Preparation of specimens	4
6.2	The initial defect	4
6.3	Attaching the load-block to the specimen	4
6.4	Moisture conditioning	5
6.5	Final specimen preparation and measuring dimensions	5
6.6	Number of specimens	6
7	Procedure	6
7.1	Performing the calibration of the ELS fixture	6
7.2	Pre-cracking the specimens	7
7.3	Testing the samples in mode II from the precrack formed in 7.2	8
8	Data analysis	8
8.1	The points for data analysis	8
8.2	Determination of the ELS clamp correction	10
8.3	Determination of GIIC values	11
9	Precision	13
10	Test report	14
Annex A (informative) Large displacement and load-block correction factors		16
Bibliography		18
