ISO 14853:2016-07 (E)

Plastics - Determination of the ultimate anaerobic biodegradation of plastic materials in an aqueous system - Method by measurement of biogas production

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Principle 3

5 Reagents and materials 3

6 Apparatus 5
6.1 Laboratory equipment 5
6.2 Apparatus for use when biogas is measured by a manometric method 6
6.3 Apparatus for use when biogas is measured by a volumetric method 6

7 Procedure 6
7.1 General 6
7.2 Digested sludge 6
7.3 Preparation of the inoculum 7
7.4 Preparation of test suspensions and controls 7
7.5 Incubation and gas measurement 8
7.6 Test duration 9
7.7 Measurement of inorganic carbon 9
7.8 Specific analyses 9

8 Calculation and expression of results 9
8.1 Amount of carbon in headspace 9
8.2 Calculation of amount of carbon in headspace when manometric measurement method is used 10
8.3 Calculation of amount of carbon in headspace when volumetric measurement method is used 11
8.4 Amount of inorganic carbon in the liquid 11
8.5 Total amount of carbon converted to gas 11
8.6 Amount of carbon in test material 12
8.7 Calculation of percentage biodegradation 12

9 Validity of results 12
9.1 Maintenance of anaerobic conditions 12
9.2 Inhibition of degradation 12
9.3 Validity of the test 12

10 Test report 13

Annex A (informative) Example of apparatus for determining the amount of biogas produced by measuring the increase in gas pressure 14

Annex B (informative) Example of apparatus for determining volumetrically the amount of biogas produced 15

Annex C (informative) Example of a biodegradation curve 17

Annex D (informative) Examples of data sheets for anaerobic biodegradability tests 18

Annex E (informative) Table of water vapour pressures at various temperatures 21

Annex F (informative) Calculation of theoretical carbon dioxide (ThCO2) and theoretical methane (ThCH4) production 22

Annex G (informative) Example of determination of recovery rate 23

Annex H (informative)Exampleofaworkflowscheme 26
