|--|--|-------------|
| Foreword .....   |  | iv          |
| Introduction .....   |  | v           |
| 1  | Scope .....                                    | 1           |
| 2  | Normative references .....                     | 1           |
| 3  | Terms and definitions .....                    | 1           |
| 4  | Principle .....                                | 2           |
| 5  | Test environment .....                         | 2           |
| 6  | Reagents .....                                 | 2           |
| 7  | Apparatus .....                                | 3           |
| 8  | Procedure .....                                | 3           |
| 8.1  | Test material .....                            | 3           |
| 8.2  | Reference material .....                       | 4           |
| 8.3  | Preparation of the sediment .....              | 4           |
| 8.4  | Test setup .....                               | 4           |
| 8.5  | Pre-conditioning phase .....                   | 4           |
| 8.6  | Start of the test .....                        | 5           |
| 8.7  | Carbon dioxide measurement .....               | 5           |
| 8.8  | End of the test .....                          | 6           |
| 9  | Calculation and expression of results .....    | 6           |
| 9.1  | Calculation .....                              | 6           |
| 9.1.1  | Amount of CO <sub>2</sub> produced .....       | 6           |
| 9.1.2  | Percentage of biodegradation .....             | 8           |
| 9.2  | Visual inspection .....                        | 8           |
| 9.3  | Expression and interpretation of results ..... | 8           |
| 10   | Validity of results .....                      | 9           |
| 11   | Test report .....                              | 9           |
| Annex A (informative) Example of respirometric system based on CO <sub>2</sub> measurement ..... |  | 10          |
| Bibliography .....   |  | 11          |
