ISO 14851:2019 (E)

Determination of the ultimate aerobic biodegradability of plastic materials in an aqueous medium — Method by measuring the oxygen demand in a closed respirometer

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Test environment

6 Reagents

- 6.1 Distilled or deionized water
- 6.2 Test medium
- 6.2.1 Standard test medium
- 6.2.1.1 Solution A
- 6.2.1.2 Solution B
- 6.2.1.3 Solution C
- 6.2.1.4 Solution D
- 6.2.1.5 Preparation
- 6.2.2 Optimized test medium
- 6.2.2.1 Solution A
- 6.2.2.2 Solution B
- 6.2.2.3 Solution C
- 6.2.2.4 Solution D
- 6.2.2.5 Solution E (trace-element solution, optional)
- 6.2.2.6 Solution F (vitamin solution, optional)
- 6.2.2.7 Preparation
- 6.3 Pyrophosphate solution
- 6.4 Carbon dioxide absorber

7 Apparatus

8 Procedure

- 8.1 Test material
- 8.2 Reference material
- 8.3 Preparation of the inoculum
- 8.4 Test

9 Calculation and expression of results

- 9.1 Calculation
- 9.2 Expression and interpretation of results

10 Validity of results

11 Test report

Annex A (informative) Theoretical oxygen demand (ThOD)

- A.1 Calculation of the ThOD

A.2 Example: Poly(β-hydroxybutyric acid) (PHB)
A.3 Example: Blend of polyethylene/starch/glycerol

Annex B (informative) Correction of BOD values for interference by nitrification

B.1 Influence of nitrification
B.2 Example

Annex C (informative) Principle of a closed manometric respirometer

Annex D (informative) Two-phase closed-bottle version of the respirometric test

D.1 Principle
D.2 Special apparatus
D.3 Procedure
D.4 Calculation of results

Annex E (informative) Example of the determination of a carbon balance

E.1 Principle
E.2 Test procedure
E.3 Calculation of the carbon balance
E.4 Example: Carbon balance of poly(β-hydroxybutyrate[5])

Annex F (informative) Example of a determination of the amount of water-insoluble polymer remaining at the end of a biodegradation test and the molecular mass of the polymer

Annex G (informative) Example of the determination of the CO2 absorbed in the absorbent

G.1 Principle
G.2 Test procedure
G.3 Calculation
